# Introduction

1

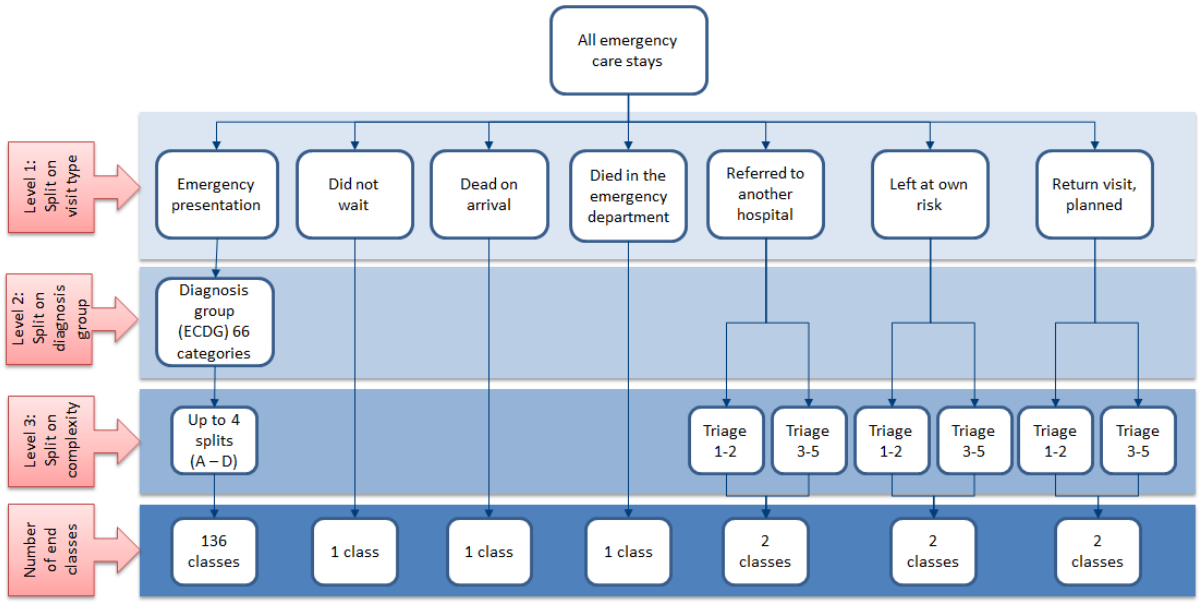
This is a technical compendium to the *Public consultation paper* for the Australian Emergency Care Classification (AECC). The *Public consultation paper* seeks stakeholders' views on the proposed classification. This document contains further information on the classification end classes and the grouping logic, to assist stakeholders in the review of the proposed classification.

## Overview of AECC

The proposed AECC is shown in Figure 1:

- The first level groups emergency stays into those requiring emergency care and a small set of other classes, some with no further splits.
- The second level groups emergency stays into clinically meaningful groups using emergency department diagnosis. The groupings of emergency department diagnoses are referred to as 'emergency care diagnosis groups' (ECDGs).
- Where required, the third level splits the ECDGs to reflect different levels of severity and/or complexity (consequently also reflecting resource use).

**Figure 1 – Overview of AECC**



The proposed classification has 145 end classes.

# Document structure

This document contains the following information to assist with providing feedback on the draft AECC:

- **Chapter 2**: Regression trees – shows the grouping logic of the draft AECC classes diagrammatically.
- **Chapter 3**: AECC grouping logic – shows the grouping logic of the draft AECC classes in text form.
- **Chapter 4**: AECC end class costs and cost dispersion – shows a table of the average costs by end class, and box plots of the dispersion of costs of the stays within each draft AECC end class. The data is from the *Emergency care costing study*.
- **Chapter 5**: Indicative national volumes for end classes – shows the number of stays assigned to each draft AECC end class using data from the National Hospital Cost Data Collection (NHCDC) for 2014-15.
- **Chapter 6**: Mapping the IHPA ICD-10-AM short list to ECDGs – shows IHPA's Emergency department ICD-10-AM (9th edition) principal diagnosis short list mapped to the proposed ECDGs.

# Regression trees

2

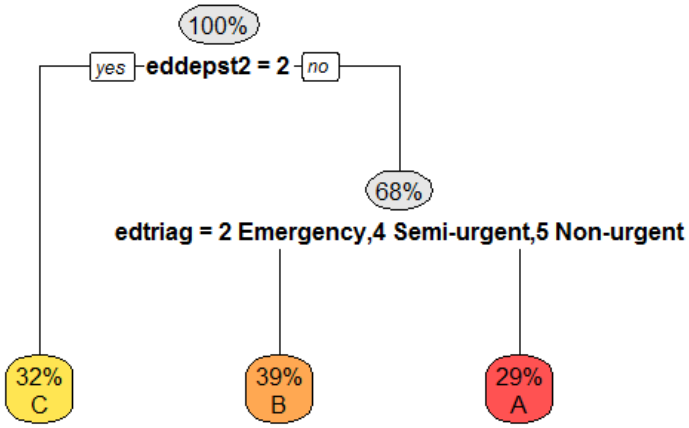
This Chapter shows the AECC grouping logic diagramtically, as regression trees.

In the trees, the 'Yes' and 'No' branches have only been labelled at the top level. Where a tree branches out further, 'Yes' is always to the left, and 'No' to the right.

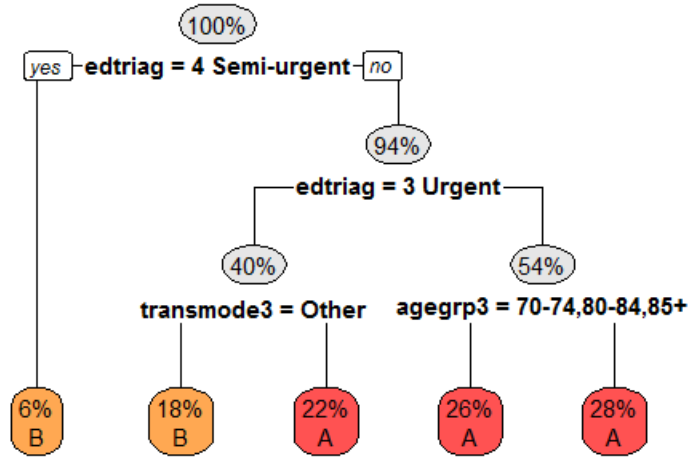
The regression trees below and grouping logic shown in the next Chapter use shorthand to refer to variables used in the draft classification and values within those variables. A key for these is in the table below. Age groups are not included in the table as they are adequately labelled in the regression trees and grouping logic table.

| Variable name | Description | Values |
|---|---|---|
| Edtriag | Triage (urgency) | 1 = Resuscitation<br>2 = Emergency<br>3 = Urgent<br>4 = Semi-urgent<br>5 = Non-urgent |
| Edtriag2 | Triage (urgency) collapsed categories | 1_2 = Resuscitation or Emergency<br>3 = Urgent<br>Other = Semi-urgent or Non-urgent |
| Transmode2 | Transport mode | 1 = Ambulance, air/helicopter<br>2 = Police/corrections<br>8 = Other<br>9 = Not stated/unknown |
| Transmode3 | Transport mode collapsed categories | 1 = Ambulance, air/helicopter<br>Other = all other |
| Eddepst | Episode end status | 1 = Admitted<br>2 = Departed<br>3 = Ref. to another hosp<br>4 = Did not wait<br>5 = Left at own risk<br>6 = Died in ED<br>7 = Dead on arrival |
| Eddepst2 | Episode end status collapsed categories | 1_3_6 = Admitted or Ref. to another hosp or Died in ED<br>2 = Departed<br>5 = Left at own risk<br>Other = Did not wait or Dead on arrival |
| A, B, C, D | End class representing complexity / resource use | Values represent complexity / resource use of end classes with A representing the highest cost, and D representing the lowest cost.<br><br>Note, where there is only one resulting end class, this has been labelled A, in the interim, despite there being no differentiation in complexity for the ECDG. |

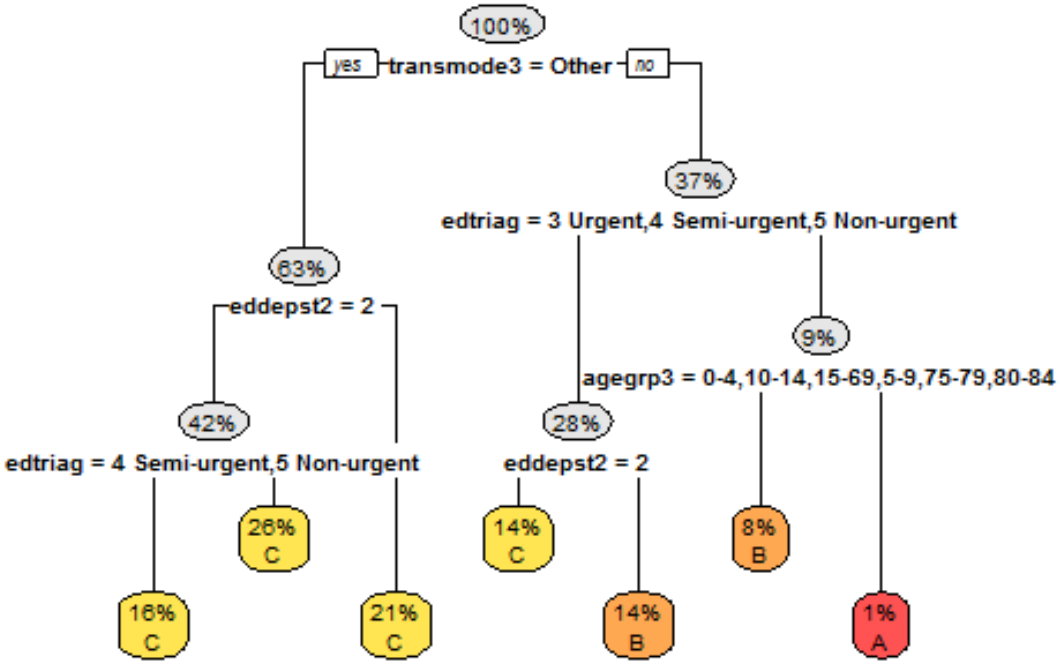
## B63 Dementia / chronic brain syndrome



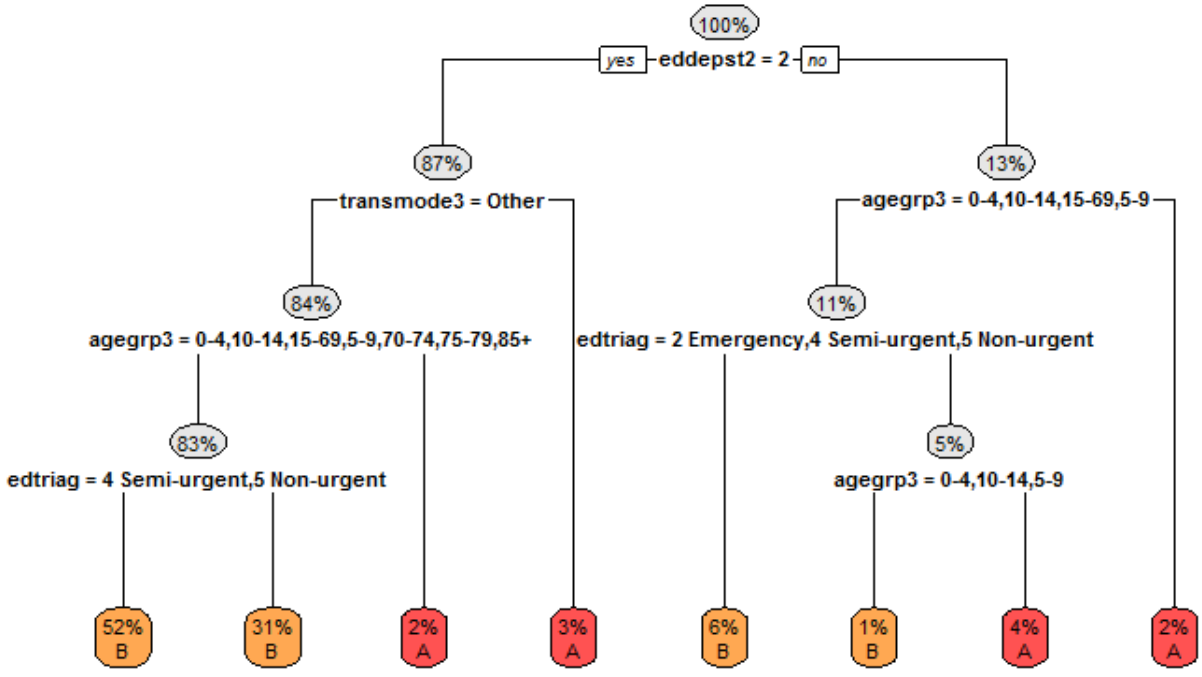
## B70 Stroke & other cerebrovascular disorders



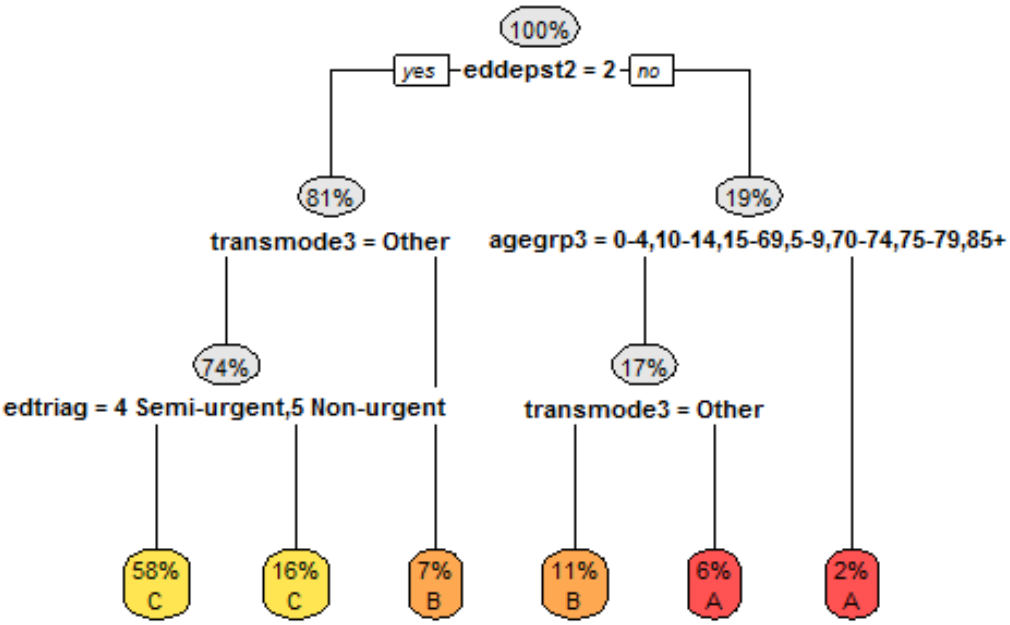
## B81 Disorders of the nervous system, other



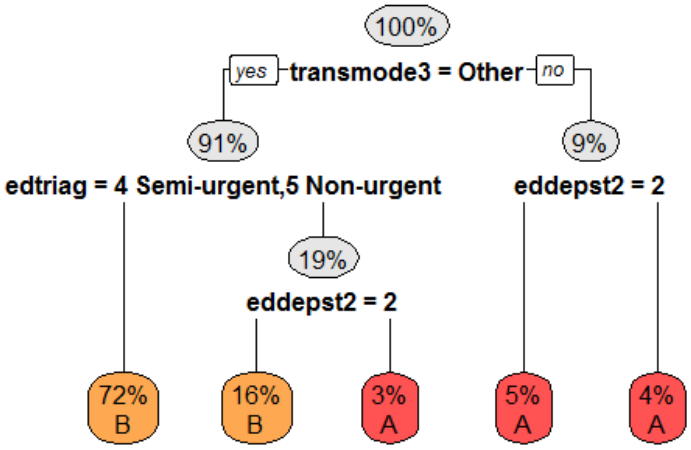
## C633 Eye disorder, other



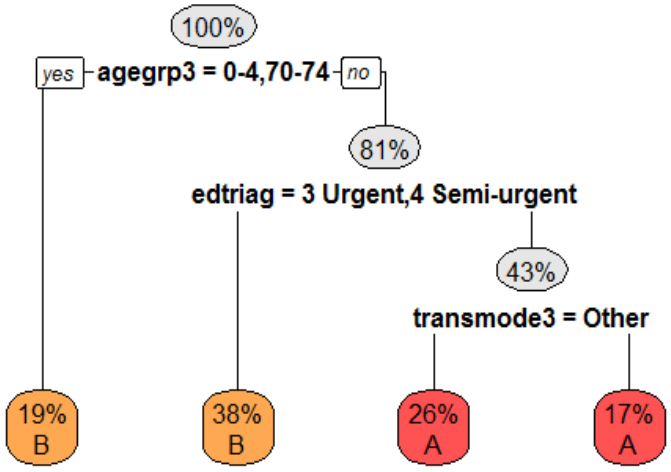
## D66 Ear, nose, mouth and throat disorders, other



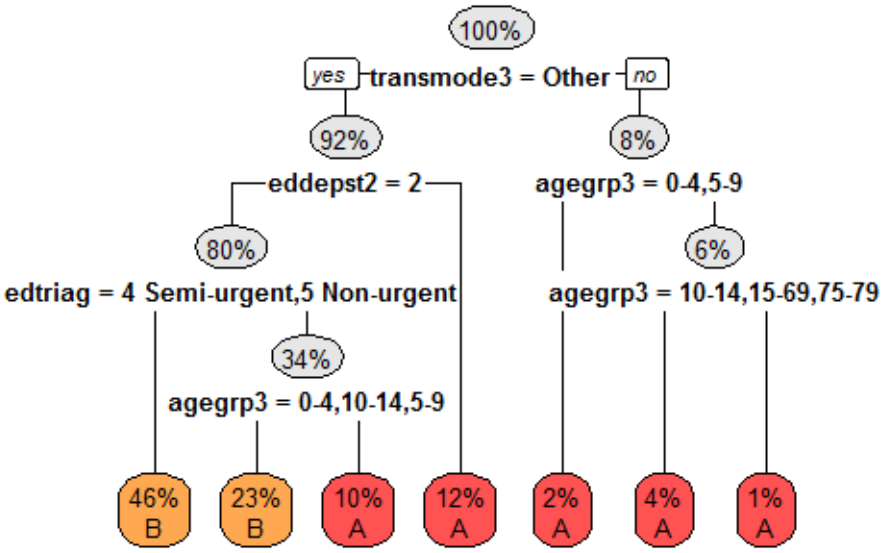
## D671 Teeth and supporting structures disorders, other



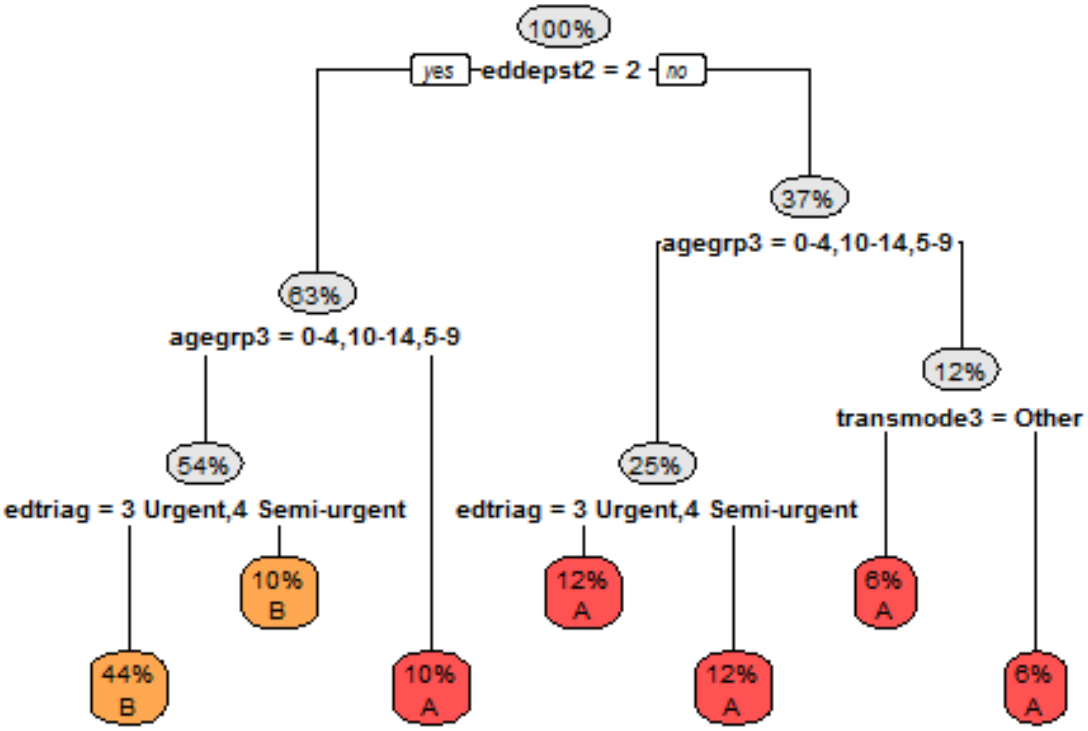
## E61 Major respiratory diagnosis



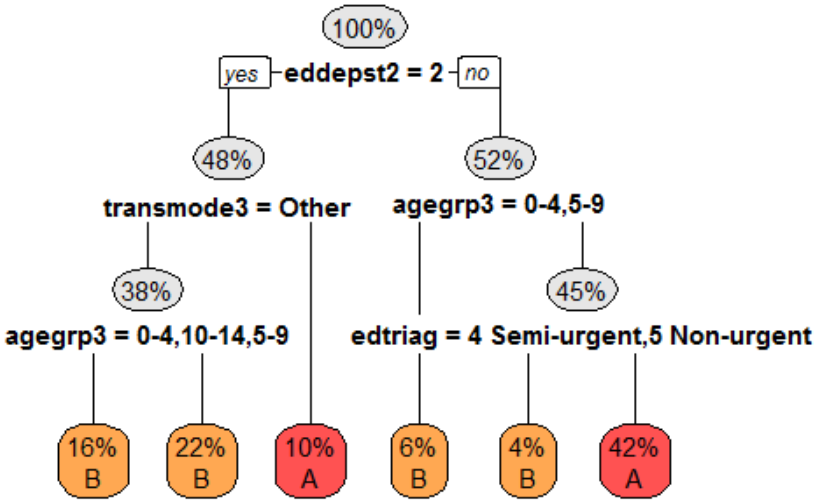
## E623 Upper respiratory tract infection (URTI), other



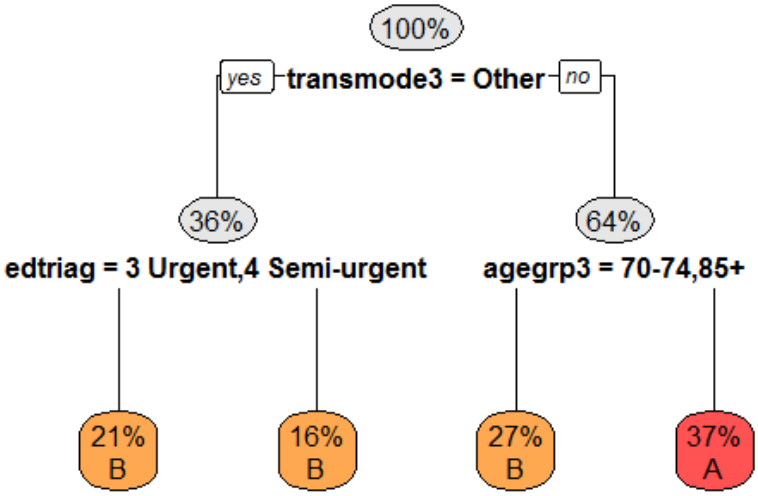
## E69 Asthma/ wheeze/ croup/ airway infection



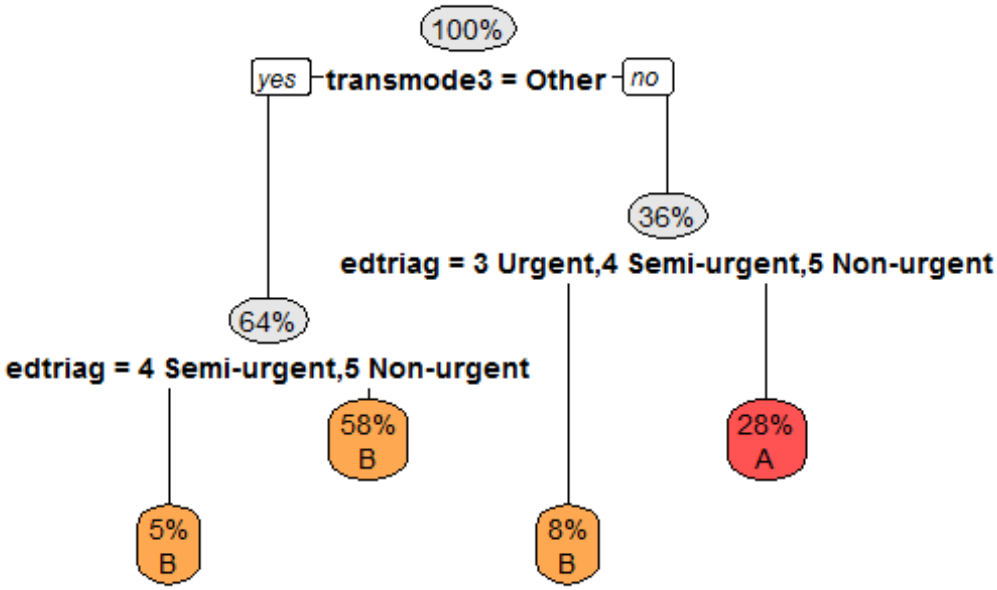
## E753 Respiratory disorder, other



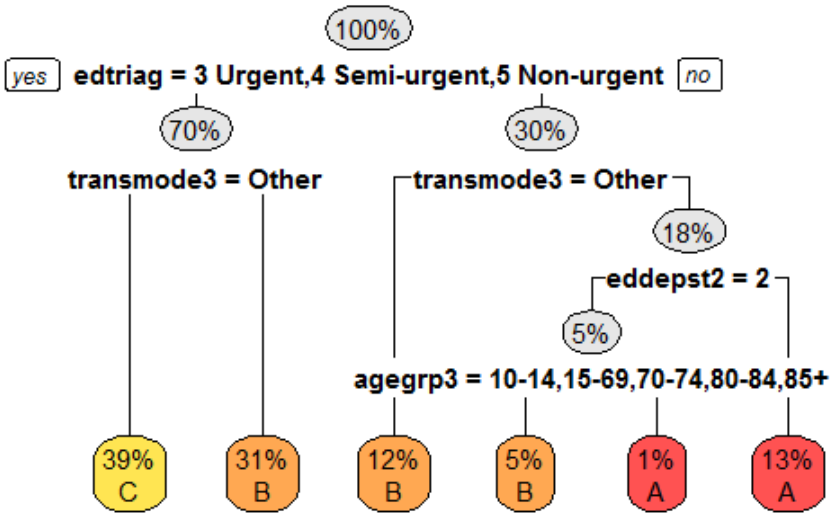
## F62 Heart failure and shock



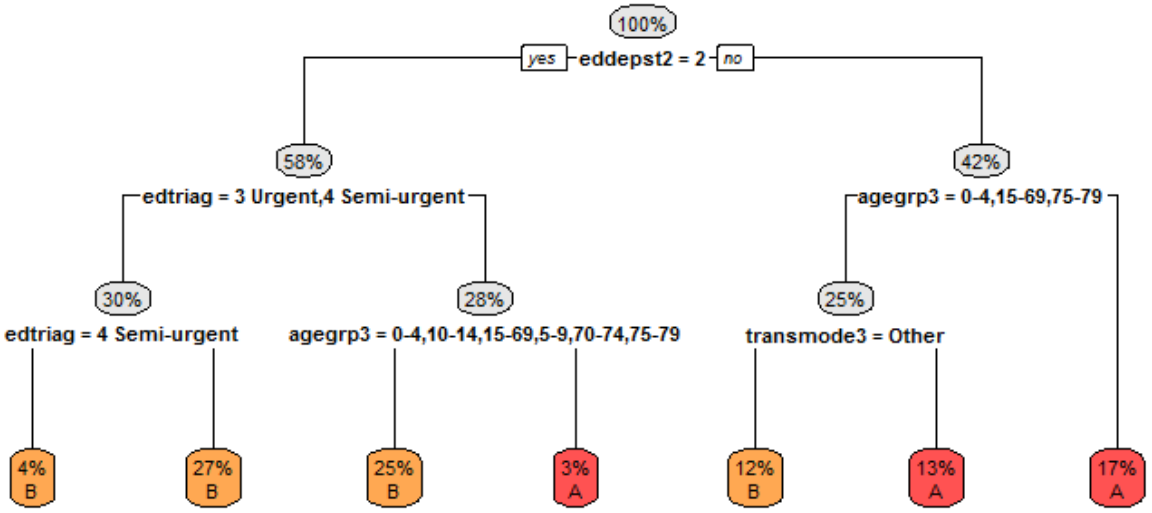
## F74 Chest pain



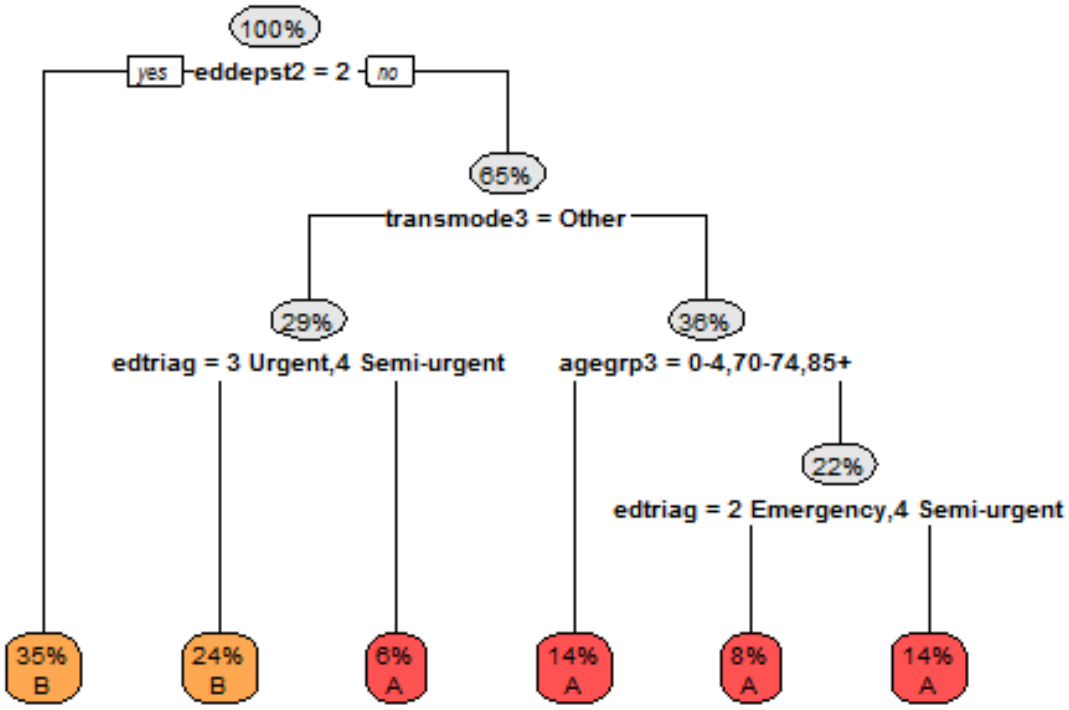
## F75 Circulatory disorder, other



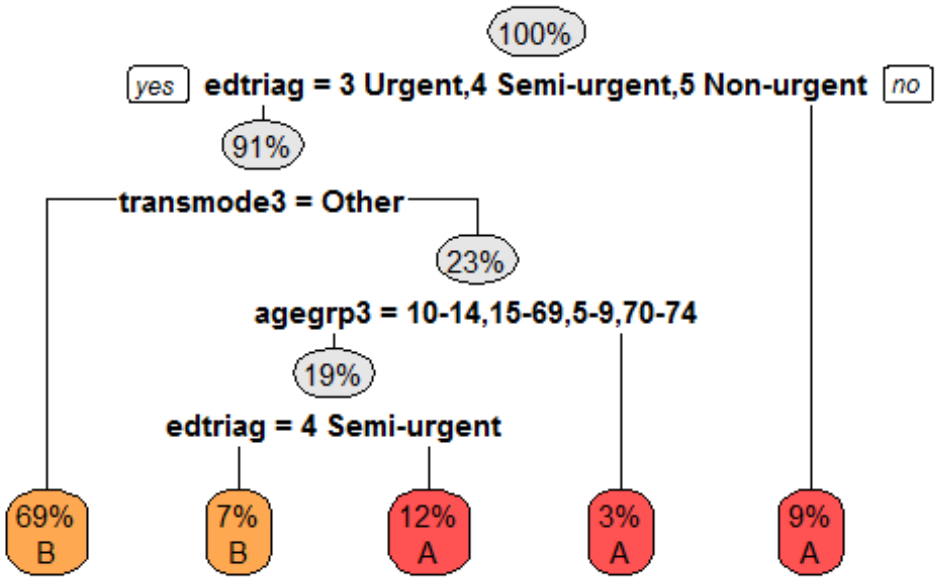
## F76 Arrhythmia and cardiac arrest



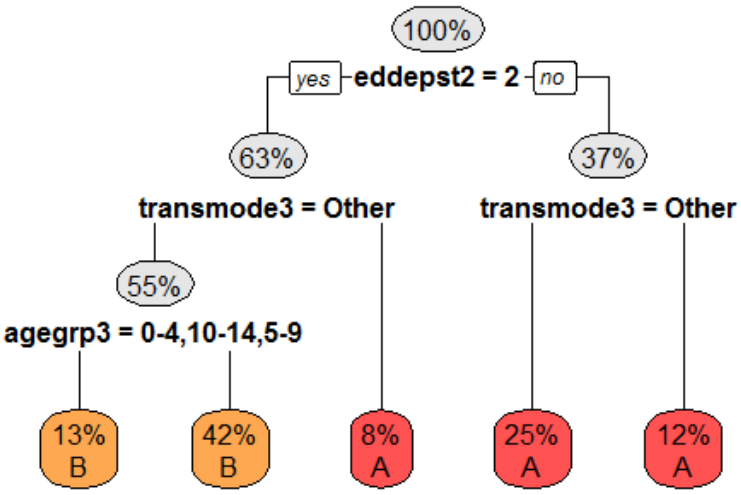
## G61 Gastrointestinal haemorrhage



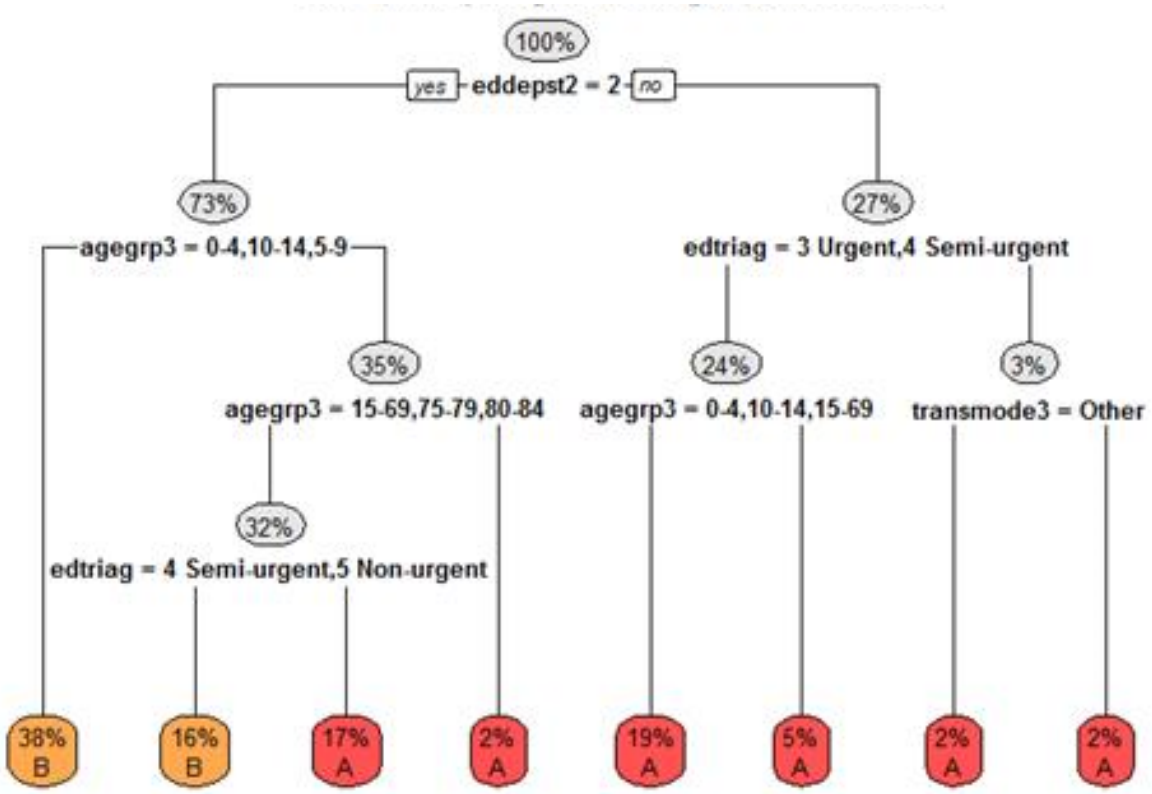
## G661 Gastrointestinal peritonitism/ perforation



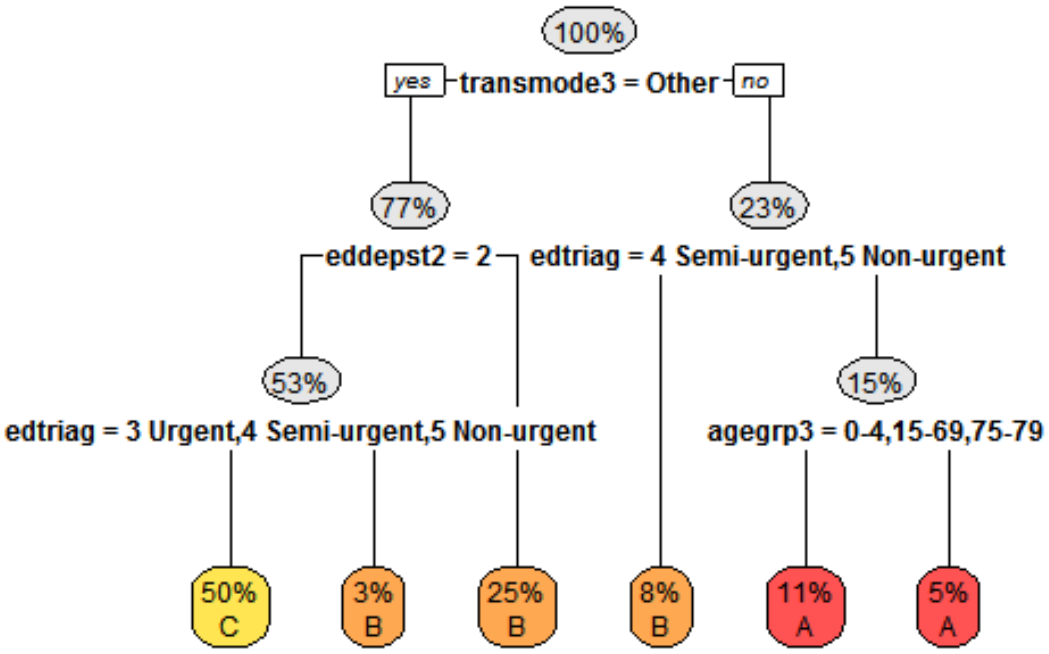
## G662 Abdominal pain



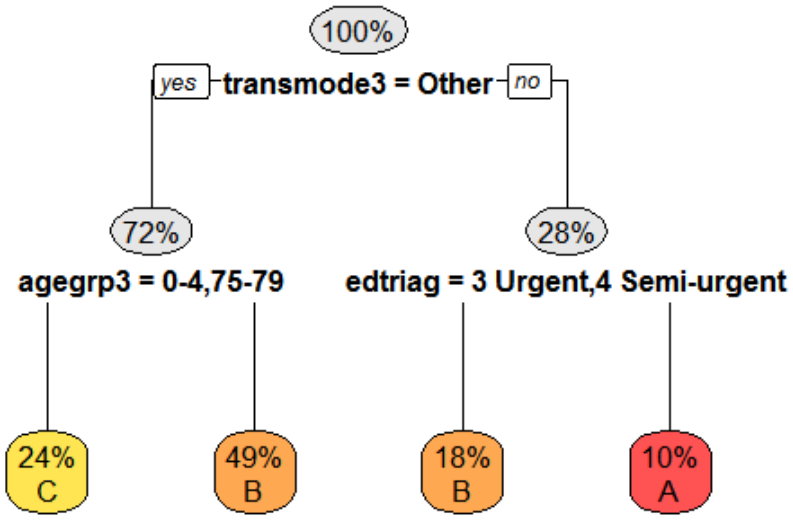
## G67 Oesophagitis and gastroenteritis



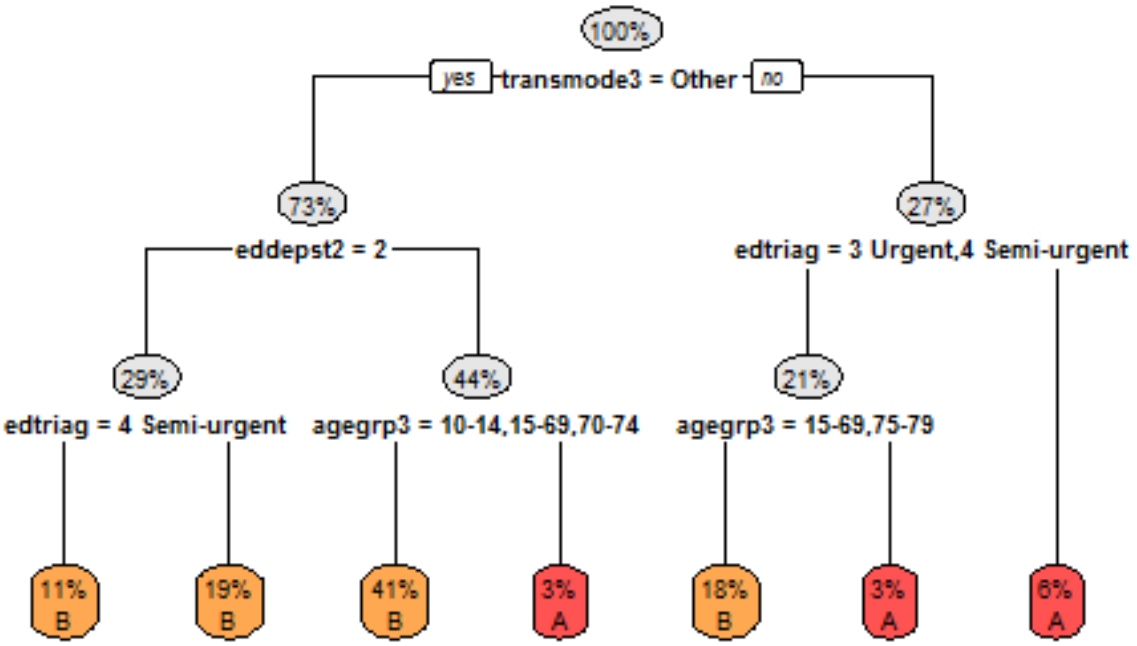
## G702 Digestive system disorders, other



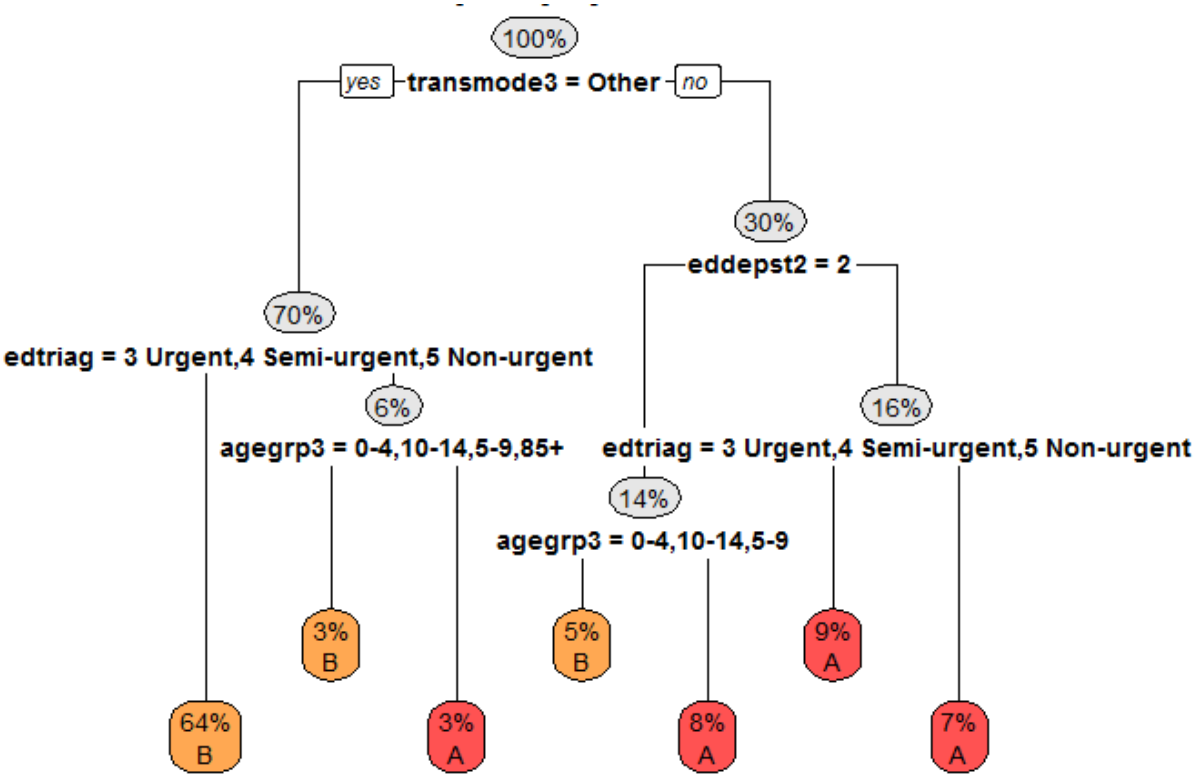
## H63 Disorders of liver



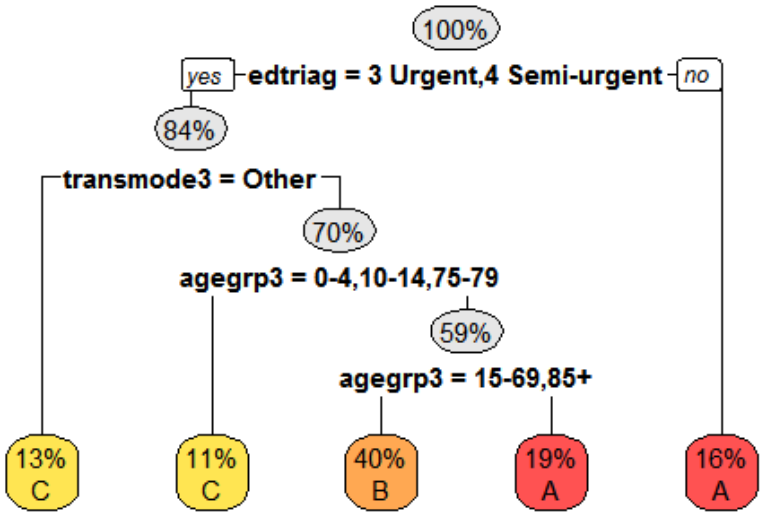
## H64 Disorder of the biliary tract



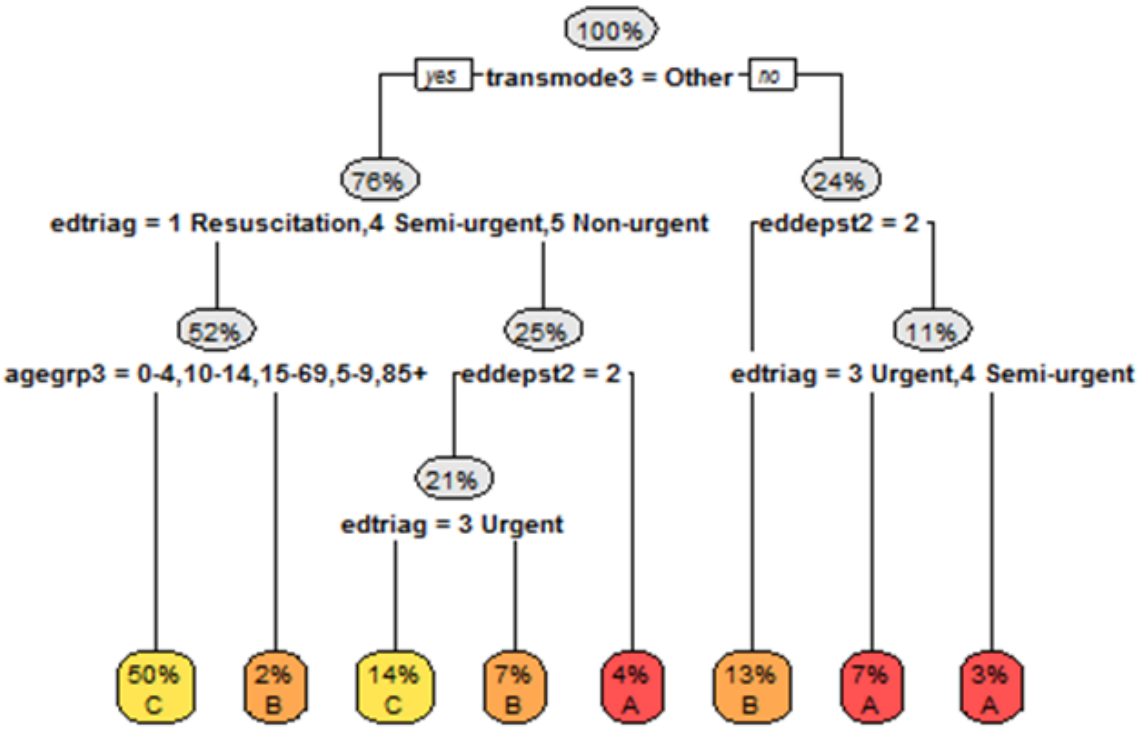
## I01 Major injury



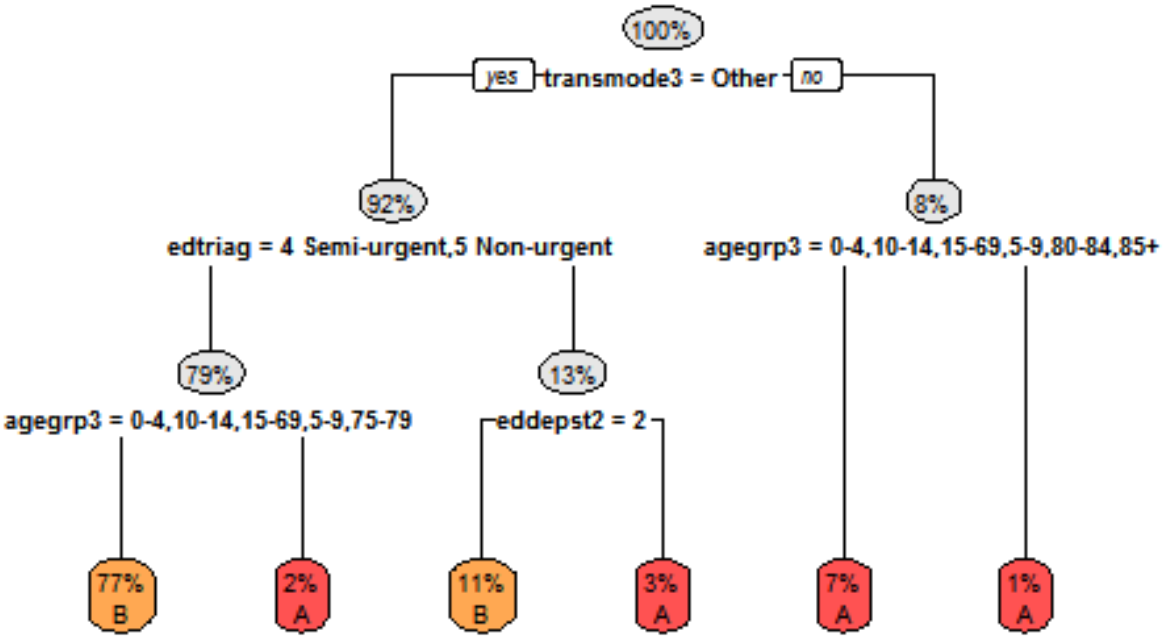
## I02 Fractures of neck of femur



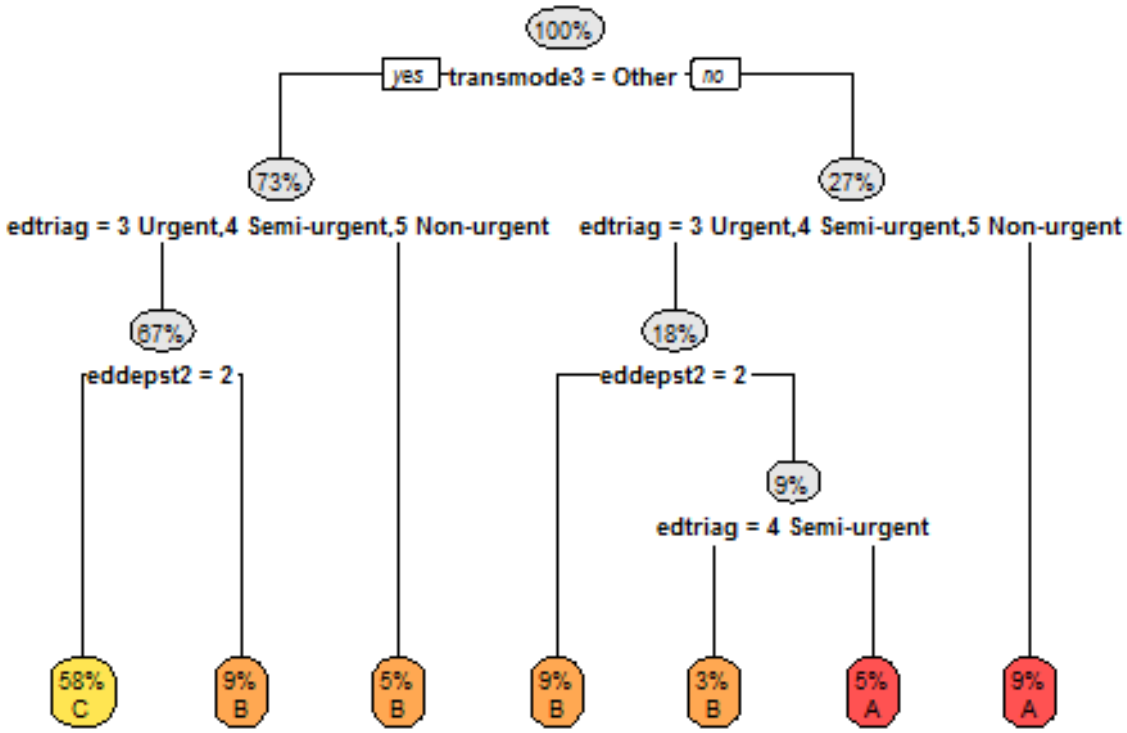
## I03 Fracture of shoulder and lower leg, dislocation, sprain and strain



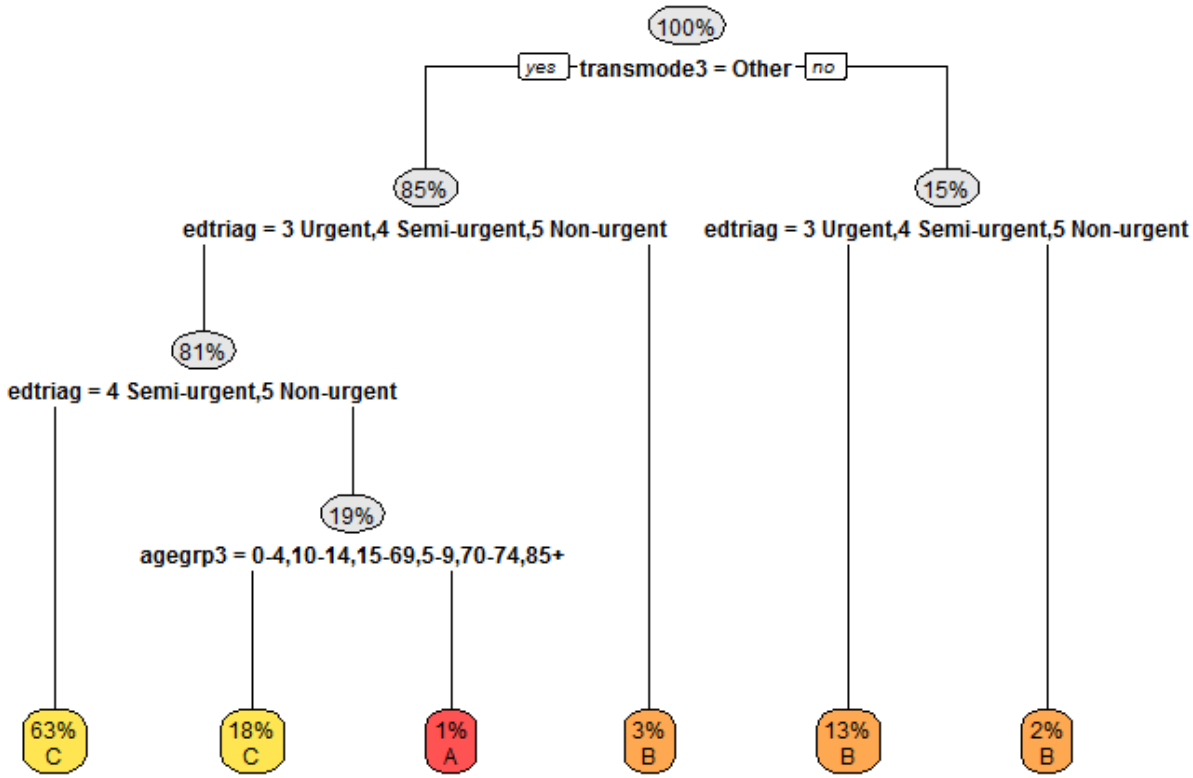
## I04 Injuries, fractures (forearm, wrist, ankle, foot), and other injuries



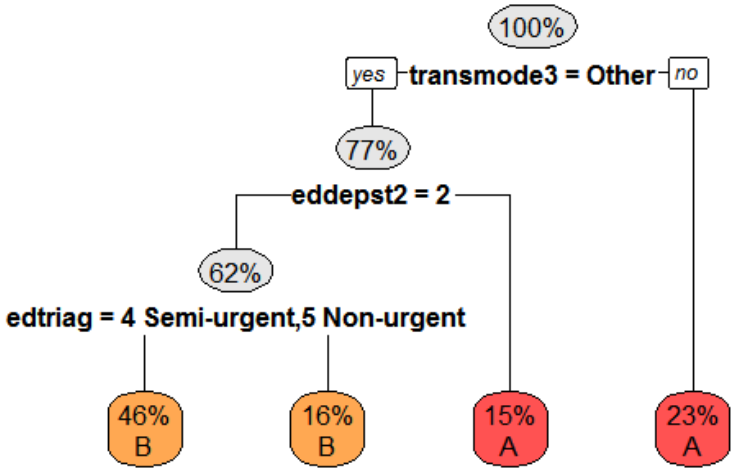
## I05 Injury, other



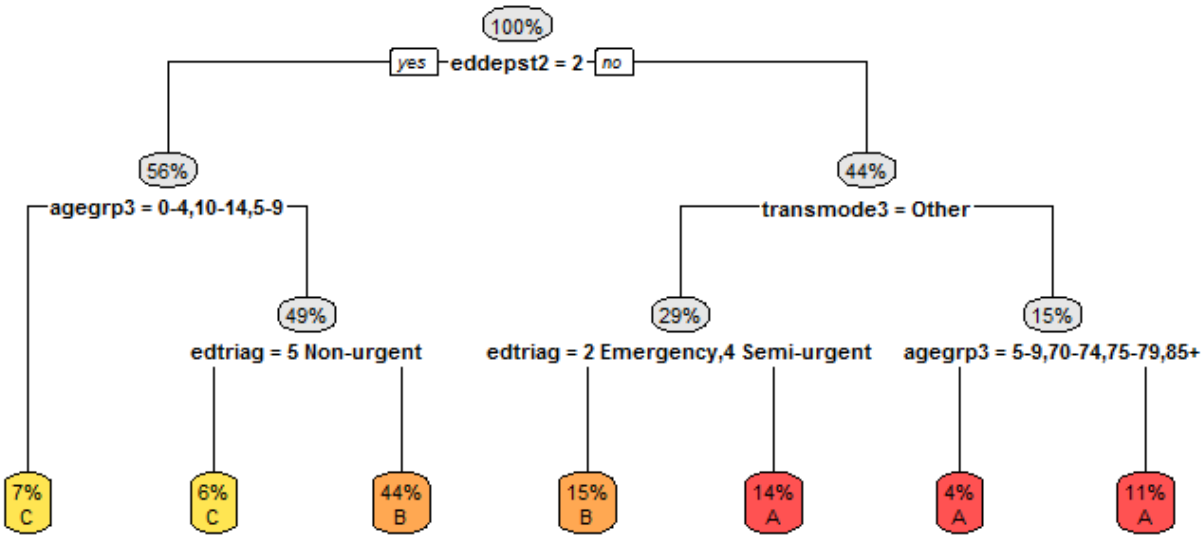
## I06 Minor injury



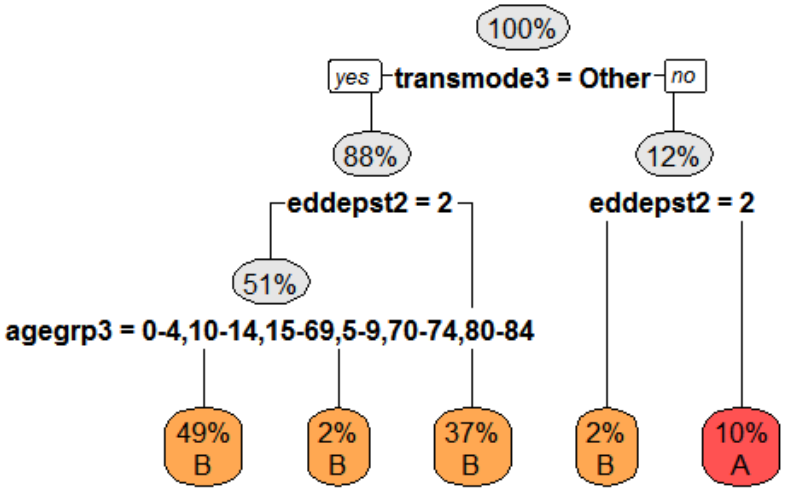
## I71 Musculotendinous disorders, other



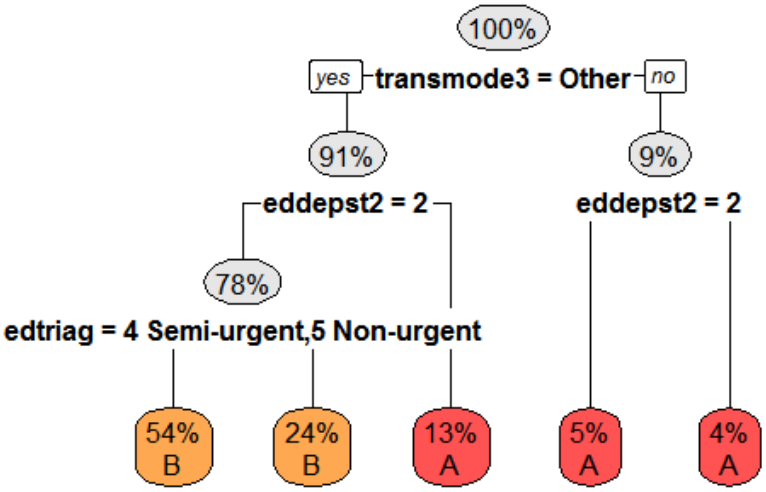
## I85 Complications of surgical and medical care



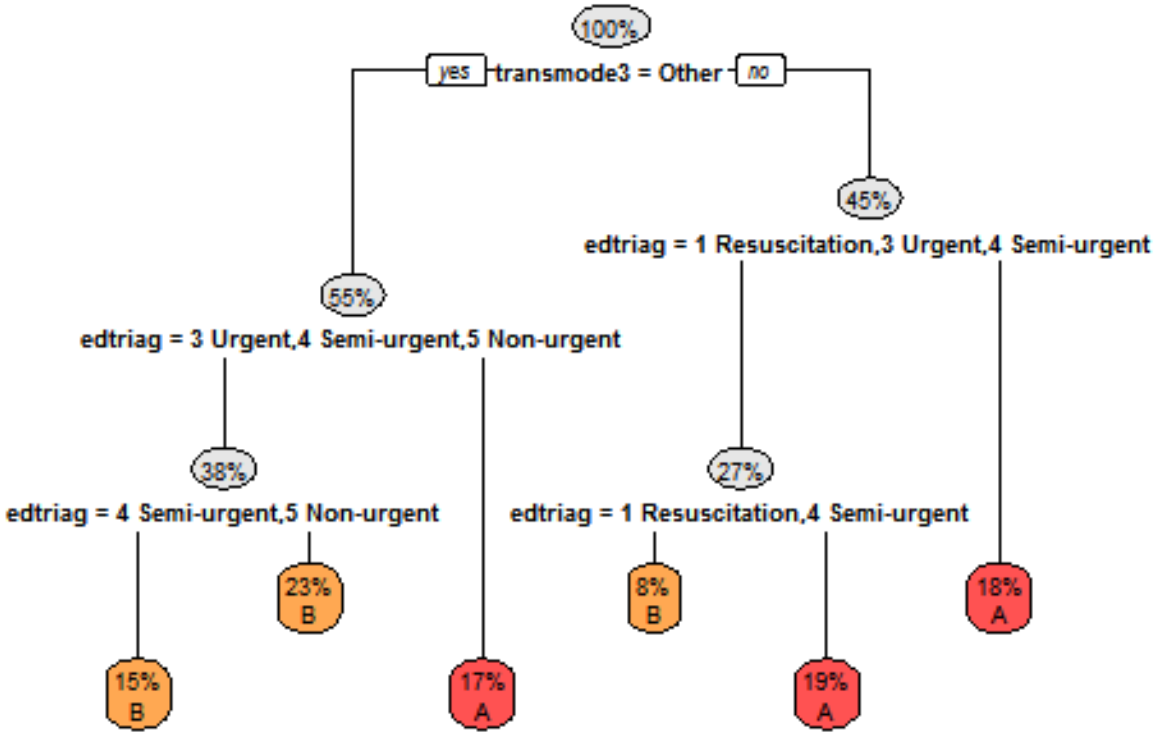
## J64 Cellulitis/ skin infection



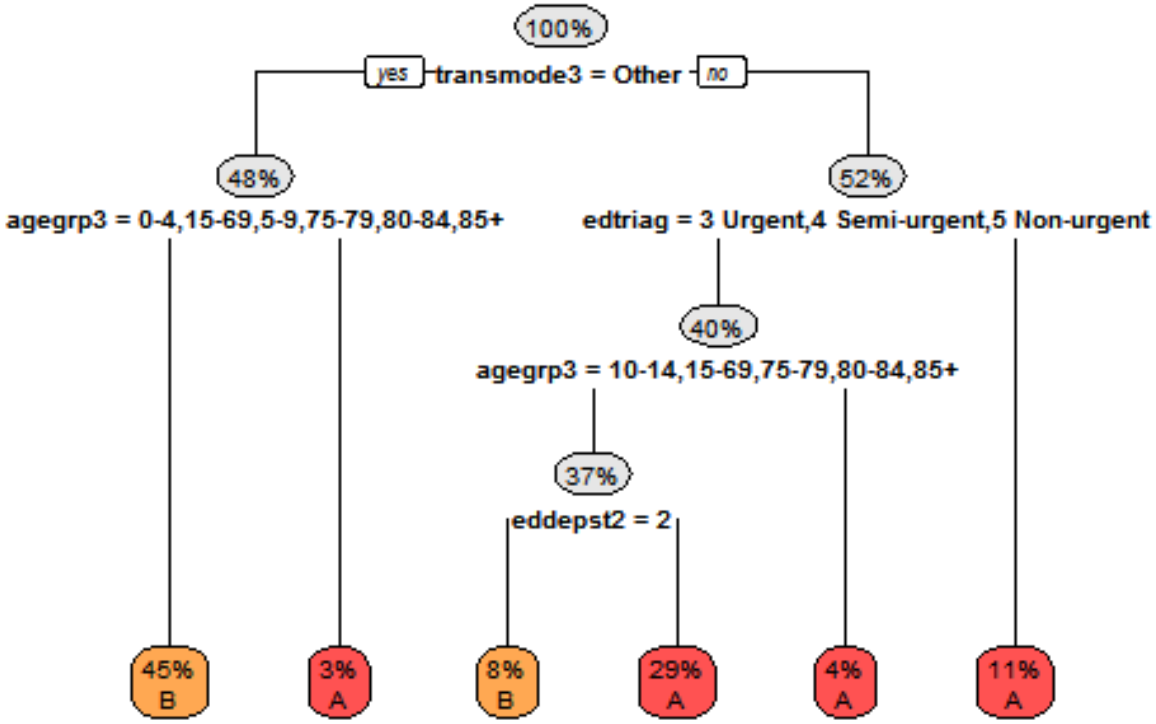
## J67 Skin disorders, other



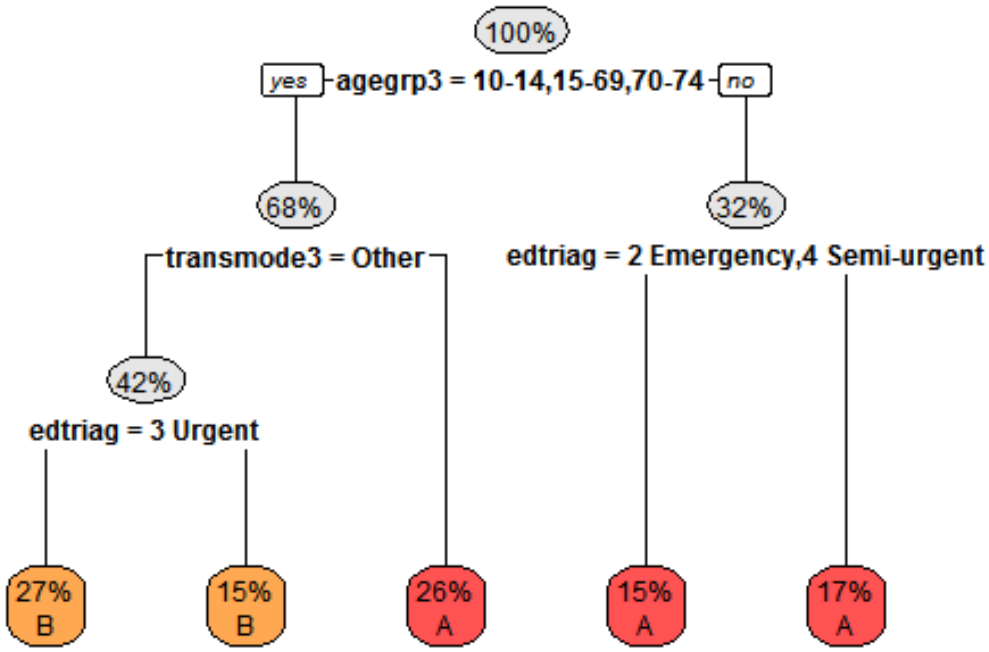
## K60 Diabetes



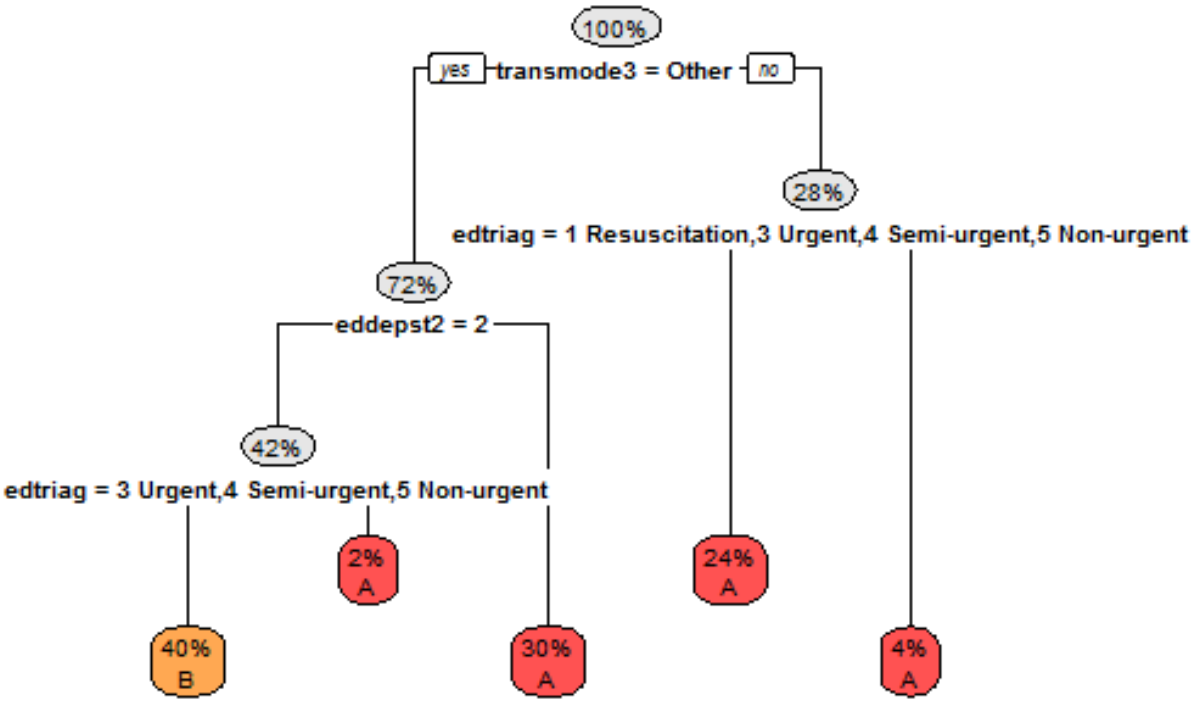
## K62 Miscellaneous metabolic disorders



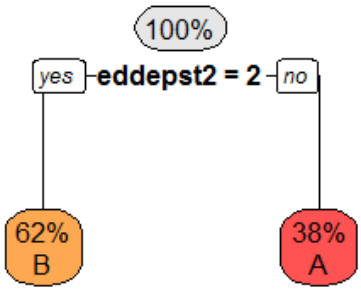
## L60 Renal failure



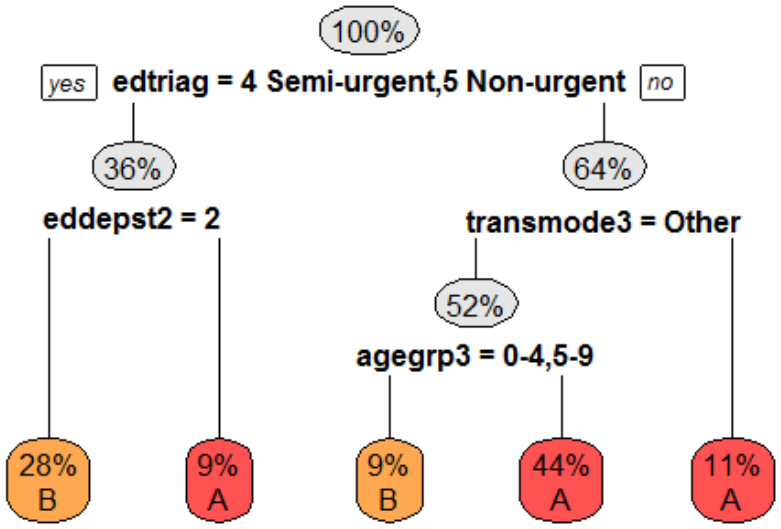
## L672 Kidney and urinary tract disorder, other



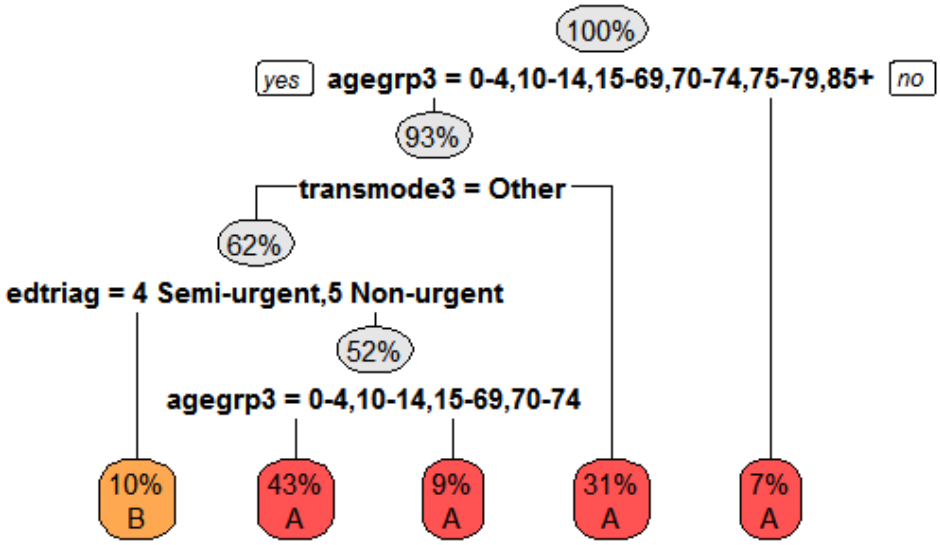
## P68 Perinatal disorders



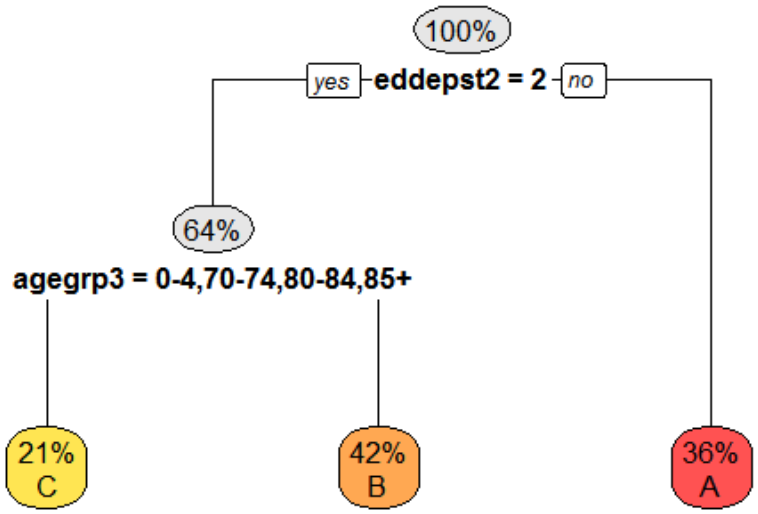
## Q60 Reticuloendothelial and immunity disorder



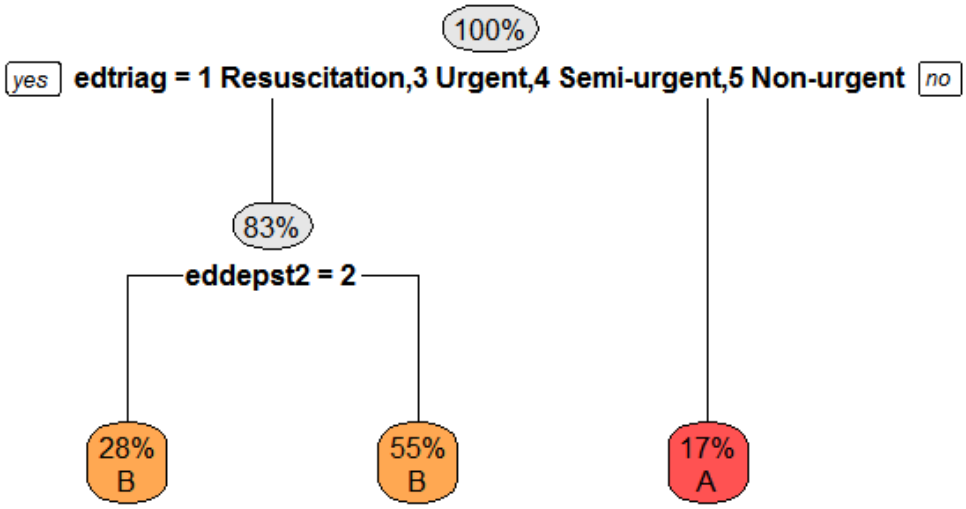
## Q61 Red blood cell disorders



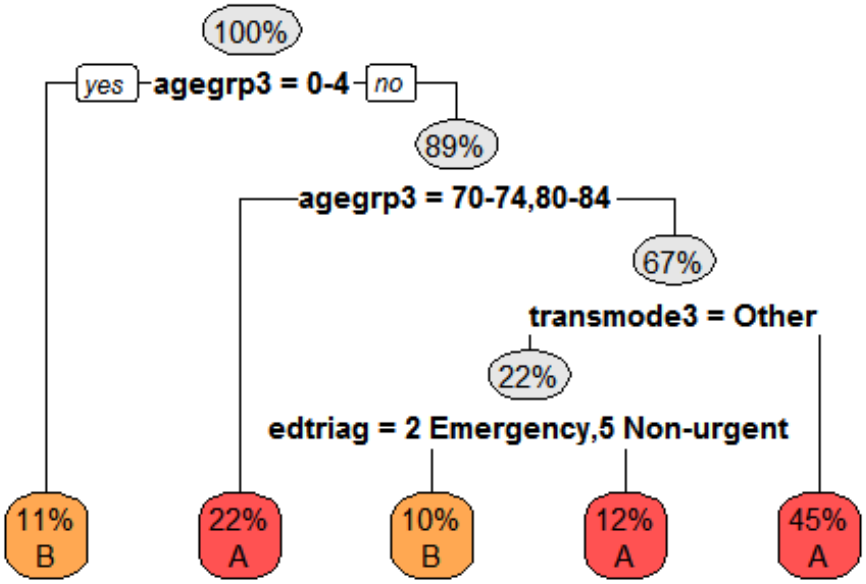
## Q62 Haemostasis



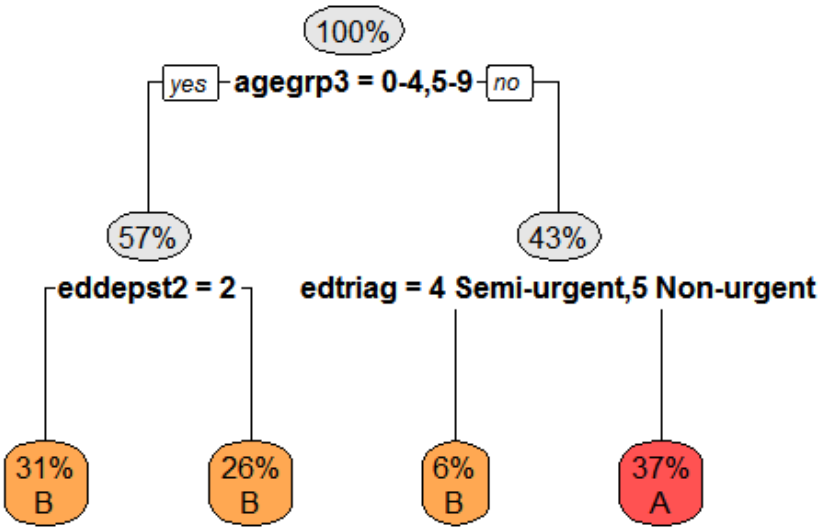
## R62 Neoplastic disorders



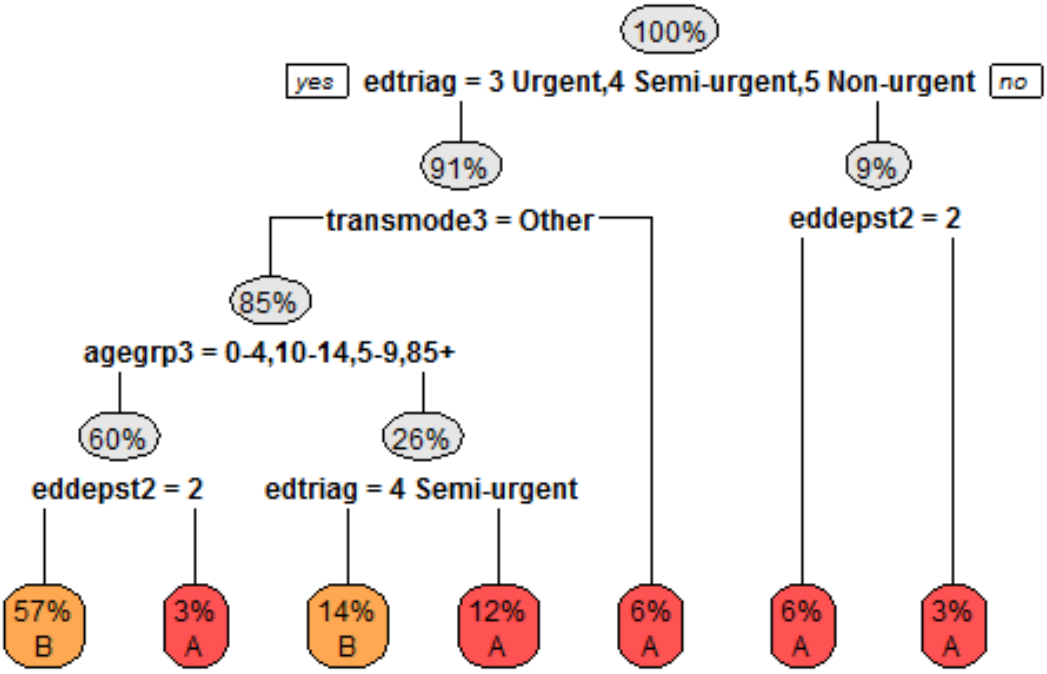
## T60 Septicaemia



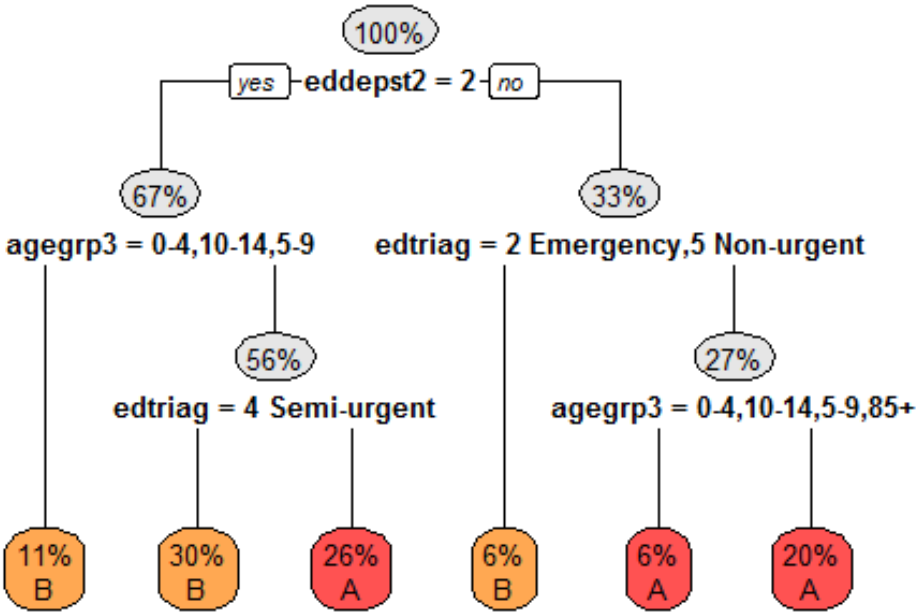
## T62 Fever of unknown origin



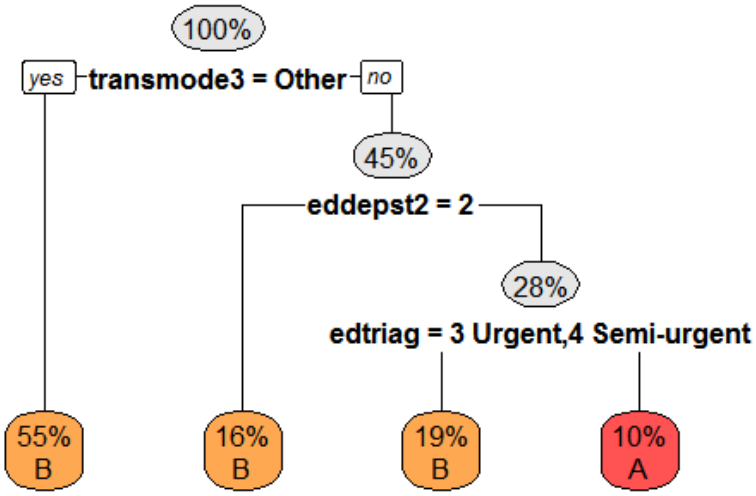
## T63 Viral illness



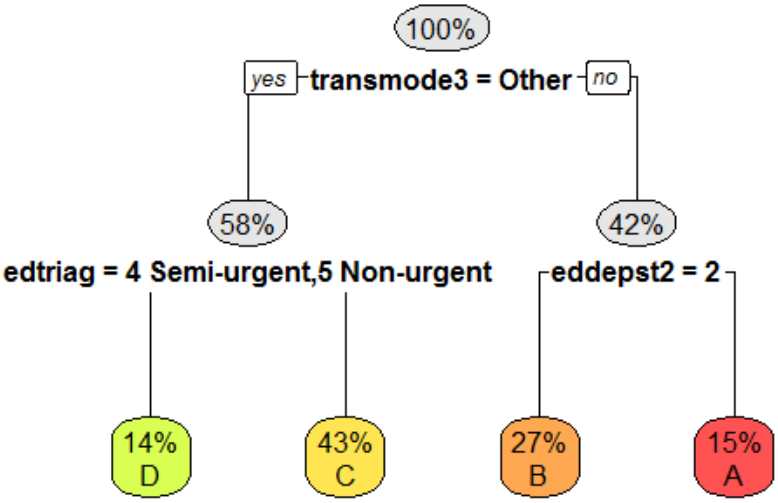
## T64 Infectious and parasitic disease, other



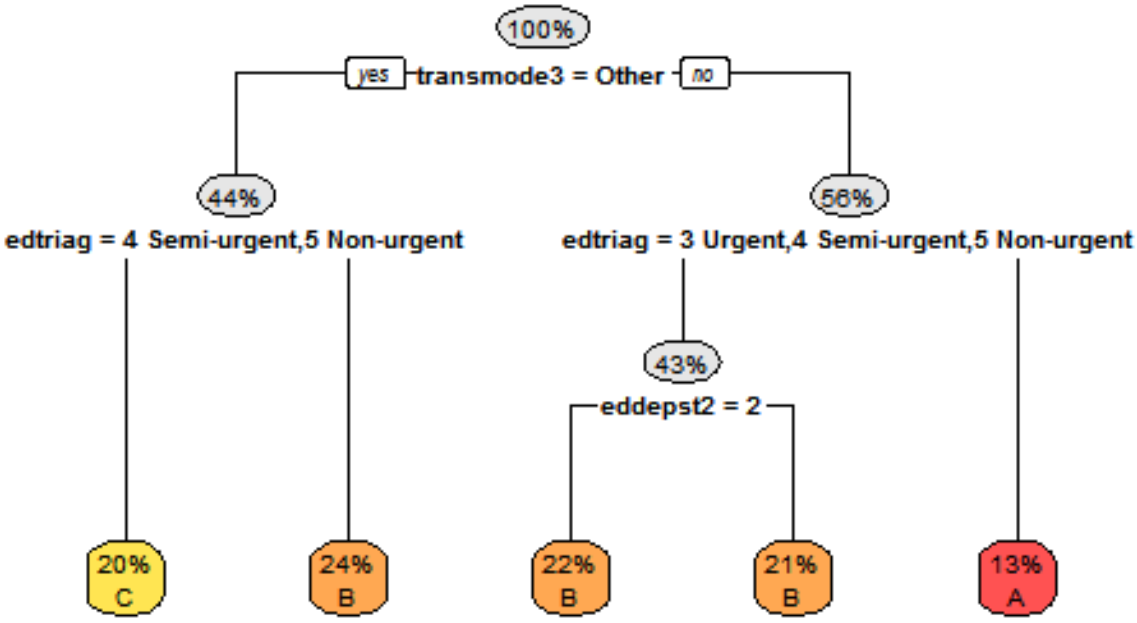
## U62 Psychosis



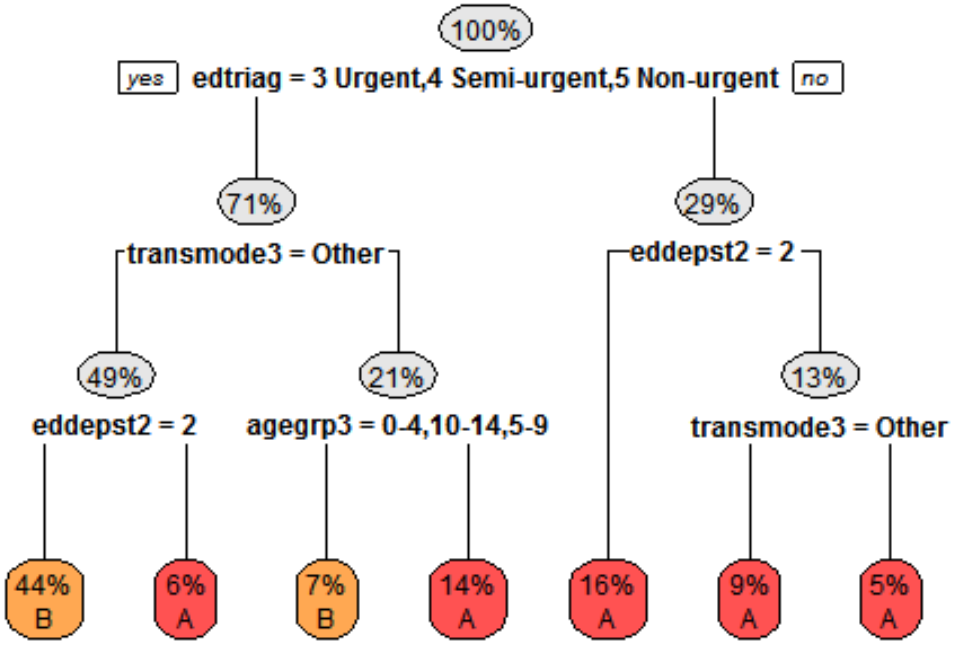
## U69 Mental and behavioural disorder, other



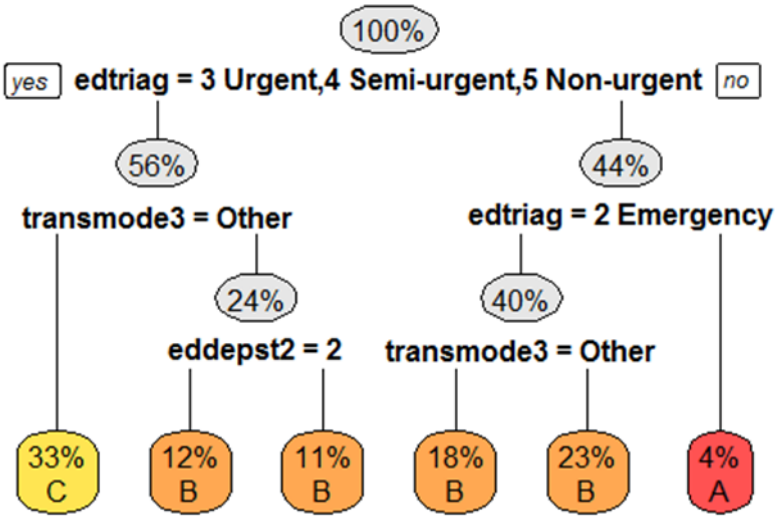
## V69 Alcohol and/ or drug related mental and behavioural disorders



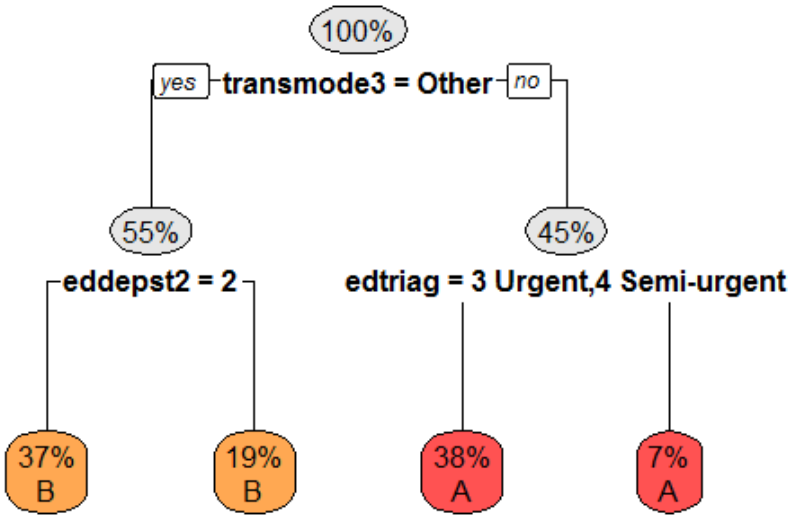
## X61 Allergic reactions



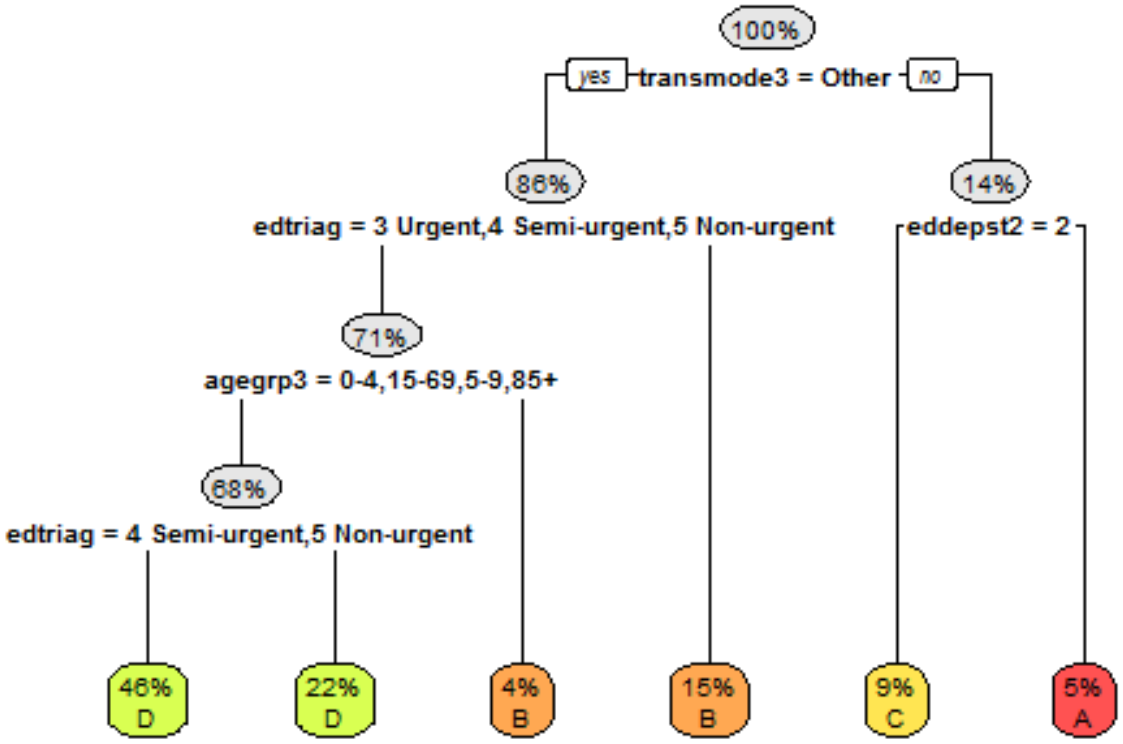
## X62 Poisoning



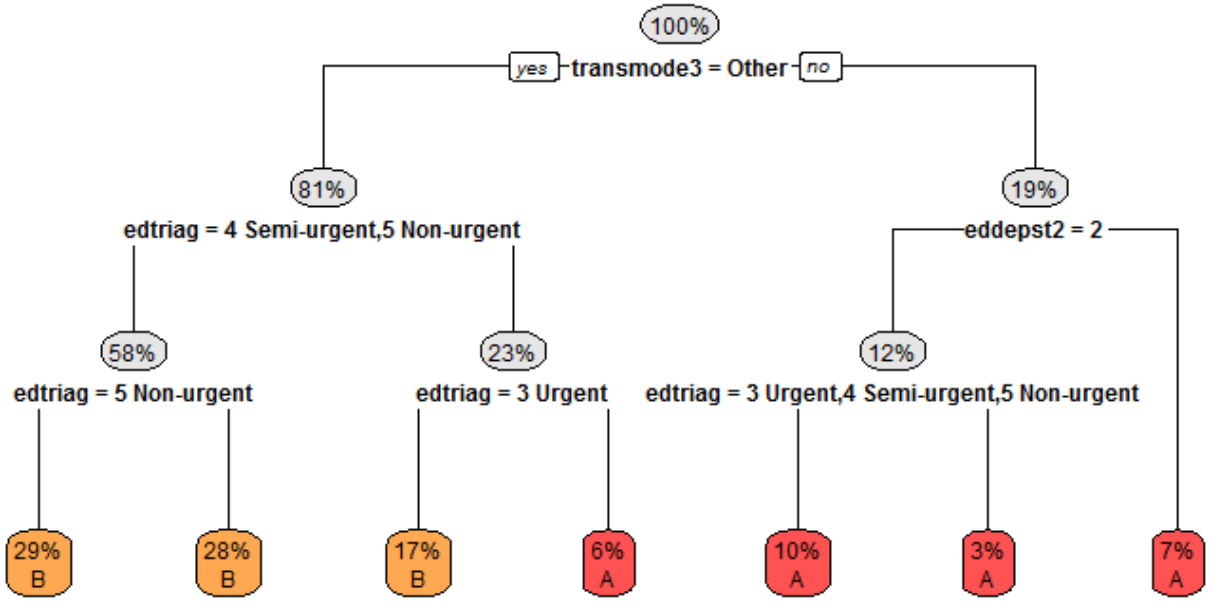
## X64 Abuse and neglect



## Y62 Burns



## Z64 Other factors influencing health status



# AECC grouping logic 3

This Chapter shows the AECC grouping logic in text form.

The legend for the variable names and values is in the previous Chapter. For ECDGs with multiple levels, level A is the most complex, level B is the next most complex etc. Where there is only one level, level A does not relate to complexity.

| Emergency care level 1 category and diagnosis group (ECDG) | Complexity level | Logic |
|---|---|---|
| A01 Did not wait | A | |
| A02A Return Visit, planned, planned Triage=1,2 | A | |
| A02B Return Visit, planned, planned Triage=3,4,5 | A | |
| A03 Dead on arrival | A | |
| A04A Referred to another hospital, planned Triage=1,2 | A | |
| A04B Referred to another hospital, planned Triage=3,4,5 | A | |
| A05 Died in ED | A | |
| A06A Left at own risk, planned Triage=1,2 | A | |
| A06B Left at own risk, planned Triage=3,4,5 | A | |
| B63 Dementia/ chronic brain syndrome | A | eddepst2=1_3_6 >> edtriag=1 Resuscitation,3 Urgent |
| B63 Dementia/ chronic brain syndrome | B | eddepst2=1_3_6 >> edtriag=2 Emergency,4 Semi-urgent,5 Non-urgent |
| B63 Dementia/ chronic brain syndrome | C | eddepst2=2 |
| B64 Delirium/ confusion/ acute encephalopathy | A | edtriag=3 Urgent,4 Semi-urgent >> eddepst2=2 >> agegrp3=70-74,75-79,80-84 |

# 4

# AECC end class costs and cost dispersion

This Chapter shows the dispersion of costs within the draft AECC end classes. The data is from the *Emergency care costing study*.

A table is shown first, with the number of stays and measures of the dispersion of the costs for the draft AECC end classes. Following this, a series of box plots is shown, representing the cost dispersion for each draft end class of the classification, organised by higher level diagnosis categories.

Note that in the table, it is the mean costs that are shown. In the box plots, it is the median.

In the box plots, the lower end of the box represents the 25th percentile of cost, the upper the 75th percentile, and the vertical line within the box the median (50th percentile). The horizontal lines on either end represent the overall dispersion of costs. The circles in the background give an indication of volumes (with more circles resulting in darker background shading representing higher volumes).

| AECC end classes | Statistics from the *Emergency care costing study* | | | |
|---|---|---|---|---|
| | n | Cost – mean | Cost – standard deviation | Cost – co-efficient of variation |
| **A01 Did not wait** | | | | |
| A01_A | 1,758 | $247 | $324 | 1.31 |
| **A02A Return Visit, planned, planned Triage=1,2** | | | | |
| A02A_A | 8 | $1,126 | $607 | 0.54 |
| **A02B Return Visit, planned, planned Triage=3,4,5** | | | | |
| A02B_A | 256 | $450 | $287 | 0.64 |
| **A03 Dead on arrival** | | | | |
| A03_A | 91 | $173 | $226 | 1.31 |
| **A04A Referred to another hospital, planned Triage=1,2** | | | | |
| A04A_A | 243 | $1,352 | $1,034 | 0.76 |
| **A04B Referred to another hospital, planned Triage=3,4,5** | | | | |

** Although the average costs between the end classes marked are similar, they are being retained as separate classes due to the differences in the dispersion of costs combined with very high volumes represented by these classes when applied to national data. The volumes of activity are shown in the Chapter 5 of this document, and the cost dispersions are below.*

# 5 Indicative national volumes by end class

This Chaper shows the number of stays assigned to each draft end class using data from the National Hospital Cost Data Collection (NHCDC) for 2014-15. The purpose is to give an idea of the volumes within each class when applied to the national data. The activity data was taken from the NHCDC rather than the Non-Admitted Patient Emergency Department Care (NAPEDC) National Minimum Data Set (NMDS) as analyses for this study have focussed on cost.

| AECC class | No. of stays (NHCDC 2014-15) | AECC within class % | Overall % |
|---|---|---|---|
| **A01 Did not wait** | | | |
| A01_A | 243,576 | 100.00 | 3.84 |
| **A02A Return Visit, planned, Triage=1,2** | | | |
| A02A_A | 651 | 100.00 | 0.01 |
| **A02B Return Visit, planned, Triage=3,4,5** | | | |
| A02B_A | 107,329 | 100.00 | 1.69 |
| **A03 Dead on arrival** | | | |

| T424 Poisoning or exposure to benzodiazepines |
| T427 Poisoning or exposure to other antiepileptic and sedative-hypnotic drugs |
| T430 Poisoning or exposure to tricyclic and tetracyclic antidepressants (TCA) |
| T432 Poisoning or exposure to other antidepressants |
| T439 Poisoning or exposure to other psychotropic drug |
| T449 Poisoning or exposure to drugs affecting the autonomic nervous system |
| T451 Poisoning or exposure to immunosuppressive and antineoplastic drugs |
| T454 Poisoning or exposure to iron |
| T455 Poisoning or exposure to anticoagulants |
| T459 Poisoning or exposure to primarily systemic and haematological agent, antiallergic drugs, vitamins, or enzymes |
| T469 Poisoning or exposure to agent primarily affecting the cardiovascular system (CVS) |
| T479 Poisoning or exposure to agent primarily affecting the gastrointestinal system (GIT) |
| T487 Poisoning or exposure to agent primarily affecting the smooth and skeletal muscles or respiratory system |
| T499 Poisoning or exposure to topical agent |
| T509 Poisoning or exposure to other drugs, medicaments and biological substances |
| T510 Poisoning or exposure to ethanol (ethyl alcohol) |
| T519 Poisoning or exposure to other alcohol |
| T529 Poisoning or exposure to organic solvent |
| T58 Poisoning or exposure to carbon monoxide |

| |
|---|
| T599 Poisoning or exposure to other gases, fumes and vapours (includes smoke inhalation) |
| T629 Poisoning or exposure to noxious substance eaten as food |
| T630 Poisoning or exposure to snake venom, land and sea snakes |
| T633 Poisoning or exposure to spider venom |
| T634 Poisoning or exposure to other arthropods |
| T636 Poisoning or exposure to marine animals |
| T639 Poisoning or exposure to other venomous animal |
| T659 Poisoning or exposure to other non-medical substances |
| **X64 Abuse and neglect** |
| T741 Abuse, physical, child or adult (except sexual assault) |
| T742 Abuse, sexual (assault, rape), child or adult |
| T743 Abuse, psychological, child or adult |
| T749 Abuse, maltreatment, neglect or abandonment, child or adult |
| **Y62 Other burns** |
| T200 Burn of head or neck (except isolated burn to eye and adnexa), unspecified thickness |
| T201 Burn of head or neck (except isolated burn to eye and adnexa), superficial (erythema, sunburn, first degree) |
| T202 Burn of head or neck (except isolated burn to eye and adnexa), partial or deep partial thickness (sunburn with blisters, second degree) |
| T203 Burn of head or neck (except isolated burn to eye and adnexa), full thickness (third degree, fourth degree, complex) |
| T2109 Burn of trunk, unspecified thickness |
| T2119 Burn of trunk, superficial (erythema, sunburn, first degree) |
| T2129 Burn of trunk, partial or deep partial thickness (sunburn with blisters, second degree) |
| T2139 Burn of trunk, full thickness (third degree, fourth degree, complex) |
| T2200 Burn of shoulder or upper limb (wrist and hand if affected), unspecified thickness |
| T2210 Burn of shoulder or upper limb (wrist and hand if affected), superficial (erythema, sunburn, first degree) |
| T2220 Burn of shoulder or upper limb (wrist and hand if affected), partial or deep partial thickness (sunburn with blisters, second degree) |
| T2230 Burn of shoulder or upper limb (wrist and hand if affected), full thickness (third degree, fourth degree, complex) |
| T230 Burn of wrist, hand, or fingers, unspecified thickness |
| T231 Burn of wrist, hand, or fingers, superficial (erythema, sunburn, first degree) |
| T232 Burn of wrist, hand, or fingers, partial or deep partial thickness (sunburn with blisters, second degree) |
| T233 Burn of wrist, hand, or fingers, full thickness (third degree, fourth degree, complex) |
| T240 Burn of hip or lower limb (ankle and foot if affected), unspecified thickness |
| T241 Burn of hip or lower limb (ankle and foot if affected), superficial (erythema, sunburn, first degree) |
| T242 Burn of hip or lower limb (ankle and foot if affected), partial or deep partial thickness (sunburn with blisters, second degree) |
| T243 Burn of hip or lower limb (ankle and foot if affected), full thickness (third degree, fourth degree, complex) |
| T250 Burn of ankle or foot, unspecified thickness |
| T251 Burn of ankle or foot, superficial (erythema, sunburn, first degree) |
| T252 Burn of ankle or foot, partial or deep partial thickness (sunburn with blisters, second degree) |
| T253 Burn of ankle or foot, full thickness (third degree, fourth degree, complex) |
| T264 Burn of eye or adnexa (except with head and neck burns) |
| T284 Burn of internal organs |
| T290 Burns of multiple regions, unspecified thickness |

| |
|---|
| T291 Burns of multiple regions, superficial (erythema, sunburn, first degree) |
| T292 Burns of multiple regions, partial or deep partial thickness (sunburn with blisters, second degree) |
| T293 Burns of multiple regions, full thickness level (third degree, fourth degree, complex) |
| **Z611 Falls risk** |
| R42 Dizziness |
| **Z612 Pain syndrome** |
| R529 Pain, not referable to a site |
| **Z613 Signs and symptoms, other** |
| R18 Ascites |
