Mr James Downie
Chief Executive
Independent Hospital Pricing Authority
PO Box 483
DARLINGHURST NSW 1300

Dear Mr Downie *James*

WA SUBMISSION TO THE AUSTRALIAN NON-ADMITTED CARE CLASSIFICATION (ANACC) CONSULTATION

Thank you for the opportunity to provide a submission to the consultation paper on the development of the ANACC.

A consolidated reply to the consultation questions is provided at Attachment 1. Public Health Service Providers have provided input into the submission.

Western Australia is keen to participate in the development of a patient-centric classification system.

If your team has technical queries regarding the submission, please direct them to Bing Rivera (Bing.Rivera@health.wa.gov.au).

Yours sincerely

Dr D J Russell-Weisz
DIRECTOR GENERAL

28 March 2018

Australian Non-Admitted Care Classification Development Stakeholder Consultation Paper

WA Health Submission

Contents

1. Should the new classification for non-admitted care support the delivery of integrated care between health care settings? If yes, how?	2
2. Should the new classification for non-admitted care services account for and adapt to newer models of care and technology? If yes, how?	3
3. As the types of care delivered in admitted, non-admitted and primary care are challenged, how can the future ANACC system account for these changes?	4
4. The classification principles have been designed to guide and support the development of the future classification, do you agree with these and/or are there other principles that should be considered in developing ANACC?	5
5. Should IHPA continue to use service event as the ANACC unit of count? If yes, do you agree with the proposed revised definition of a service event? How could it be improved?	6
6. Should an episode be considered as a unit of count in the new ANACC? If not for all conditions, then for which specific conditions?	7
7. Non-admitted patients often present with multiple comorbidities, and may be treated under a chronic disease management model. Should the future ANACC system have a separate path for classifying chronic disease patients?	8
8. What implementation timeframe is required for jurisdictions to transition to a patient-based non-admitted care classification system?	9
9. What considerations should be made in relation to including a diagnosis-type variable in the future ANACC system?	10
10. Should presenting problem be used as the diagnosis type variable? If yes, do you agree with the proposed definition of 'presenting problem'?	11
11. What are your views on the proposed list of initial presenting problem/diagnosis-type and intervention-type groups presented at Appendix A? What refinements should be considered?	12
12. Do you agree with the list of complexity variables presented in Section 5.3? What other variables should be considered for the new ANACC system?	15
Attachment A: UK Patient Pathway example	17
Attachment B: List of 'health issues' used in the WA Country Health Service.....	18
Attachment C: List of commonly used diagnoses/descriptors.	22
Attachment D: List of relevant diagnosis codes and terms by Allied Health discipline .	31
Attachment E: List of service types used in WA Country Health Service, frequency and description.....	59

1. Should the new classification for non-admitted care support the delivery of integrated care between health care settings? If yes, how?

WA Health agrees that the ANACC should support the delivery of integrated care between health care settings, noting the following:

- Ideally the new classification system should be evidence-based where possible recognising the gaps in non-admitted data, yet flexible in its design to support and encourage innovative and/or best practice integrated service delivery models (existing or emerging) across primary, non-admitted and admitted care.
- Integration across health settings is heavily dependent on consistent definitions, the reliability/access of data and appropriate governance and funding mechanisms. Significant effort is required in all of these areas to truly support the delivery of integrated care models.
- If the system is to support integrated care then there needs to be a strong collaborative working arrangement between partner organisations in particular across health sectors including primary care, emergency care and community services.
- Boundary issues in the provision of non-admitted services to patients with mental health conditions where the care type is not 'mental health care' or 'psychogeriatric care'. The integration between settings and clinical areas such as physical health areas and mental health is a priority to reduce health inequalities and to provide a holistic service to the patients. The interface between classifications needs to be considered and not exclude patients with concurrent treatment pathways from different specialties and with co-morbidities. These issues are further discussed under Question 12 re complexity variables.
- The use of electronic health records to allow access to a common source of data across different health settings is a great concept however the reality of this occurring is a much longer term timeframe as the information within these is fragmented and uptake is not compulsory (at present).
- Given that hospital services and primary services are funded through different mechanisms, consideration will need to be given to how funding these two health settings will operate under a shared or integrated care model.

Further State level considerations:

Further work is required from WA Health to better streamline patient administration and clinical management systems to allow 'data sharing/access' across health settings.

Impact of the classification system on shared care models (i.e. hospital based and primary) and the interface with the Medicare Benefits Schedule system.

Further work would need to be undertaken to identify potential hidden activity/costs related to integrated care. For example, "In-reach" by non-admitted clinicians to inpatients is currently not counted i.e. when Rehab in the Home (RITH) clinicians visit inpatient prior to discharge.

2. Should the new classification for non-admitted care services account for and adapt to newer models of care and technology? If yes, how?

WA Health agrees that the ANACC support and where possible adapt to newer models of care and the increasing integration of technology, noting the following:

- Further consideration and consultation should be undertaken on current and emerging models of care for non-admitted services, hospital based, non-hospital based or both.
- Technology is being utilised more in the delivery of non-admitted care, specifically the use of telehealth and technology to support ongoing remote monitoring of patients.
- Regarding telehealth services, both sides of service should continue to be considered in the activity reporting and costing of service delivery.
- Revision of the unit of count may need to be considered to account for where the patient or provider is not present.
- It is recognised significant improvements will need to be made in costing non-admitted care services, in conjunction with improving the capture/reporting of activity data.

Further State level considerations:

Services have experienced that adopting the use of technology can actually increase the costs initially due to infrastructure costs and the cost of educating patients and carers to use the technology.

Innovative funding models may be required to initiate and boost the use of technology in the delivery of services and in funding new models of care, particularly across care sectors.

Current models of funding tend to provide payment to the health service where the patient is based. As there is expansion into different service delivery modes (such as Telehealth where there is more than one Health Service Provider involved) this needs to be considered in the application of funding to the new classification – recognising that the current classification system allocates payments to both provider and patient sites.

3. As the types of care delivered in admitted, non-admitted and primary care are challenged, how can the future ANACC system account for these changes?

As noted in Questions 1 and 2, consideration should be given to models of care that operate across multiple health care settings. This will allow the ANACC to remain flexible for emerging service delivery models while supporting best practice and the use of technology.

However, a significant challenge is the ability to accurately record activity and cost data across these care settings to enable accurate modelling and funding of services. In theory, focusing on recording activity around the patient journey will acknowledge the different settings of care, making it as seamless as possible for the patient and enable modelling of services across health settings. Additionally it is recognised that data should be recorded at a granular level however remain intuitive and not burdensome to clinicians and service providers.

The patient journey spans across primary care, secondary and tertiary care (emergency department, outpatients, inpatient and community settings) and it is important that there are commonalities between concepts and language describing diagnosis, groupings, acuity and comorbidities across classifications.

Further State level considerations:

Significant duplication in the data collected at a local level. How can WA Health improve the applicability of “single entry, multiple uses”.

Further consideration should be given to what data is being collected as much of the reported data is not used, or cases where useful data is recorded however not utilised or reported.

How state government can purchase or fund primary health care activities to encourage models that provide a suitable community-based alternative for hospital care.

4. The classification principles have been designed to guide and support the development of the future classification, do you agree with these and/or are there other principles that should be considered in developing ANACC?

Overall, WA Health agrees with the guiding principles for classification development, noting the following:

- Estimates of the activity and cost data may not be stable over time due to changing models of care. It is recognised this will also depend on the flexibility of the classification design and end classes to accommodate changing models of care.
- Consideration of how the ANACC development aligns with other classification systems to ensure comparability of data/services, where possible.
- Recognition also needs to be given to the impact on pricing and funding of non-admitted services which will result from the new classification system.

Further State level considerations:

Nil.

5. Should IHPA continue to use service event as the ANACC unit of count? If yes, do you agree with the proposed revised definition of a service event? How could it be improved?

WA Health supports the use of service event as the ANACC base unit of count however recommends that further revision of the definition be undertaken, and consideration be given to bundling/episodic counts, noting the following:

- Service event appears to be the most appropriate count in the absence of a different metric and one that health services are used to reporting. Equally service event is relatively seamless from a patient administration and documentation perspective around accountability.
- Feedback from stakeholders conveyed mixed views towards the revised definition noting that over specification of the interactions is confusing as this conflicts with the main definition component (e.g. whether a provider is present).
- Stakeholders generally supported the inclusion of the clause, *“be provided on behalf of the patient during a non-admitted multidisciplinary case conference (MDCC) where the patient is not present”*.
- The clause, *“be provided by the patient in their own environment without the presence of a healthcare provider”* was viewed as unclear and open to interpretation regarding what services may be included.
- It is recommended that the scope of services included in the unit of count be reconsidered to account for the increasing use of technology and decreasing reliance on face-to-face service delivery models. However it is also recognised that the definition should not be overly prescriptive about service delivery models so to not limit the development of more effective and efficient mechanisms for delivery of patient care.
- Further consideration given to use of emails and other applications for delivering non-admitted services to understand how these service delivery modes may be quantified.
- Participants agreed that any treatment warranting entry in the medical record should be counted as a service event, regardless of service delivery mode.

Further State level considerations:

How to better capture ‘indirect’ or ‘non-clinical’ work related to patient service event, such as advocacy/liaison, preparation, correspondence/documentation.

6. Should an episode be considered as a unit of count in the new ANACC? If not for all conditions, then for which specific conditions?

WA Health supports the consideration of the use of episodic or time-based units of count for specific conditions, however in the interim this should occur through bundling of more granular information (e.g. service events) rather than replacing service event altogether:

- Both episode and service event need to be considered at this early stage of classification development until there is further clarity for which diagnoses and clinical pathways may be considered to be grouped under episode of care or within a bundled package of care.
- Episodic unit of count may be beneficial for settings where there is a lot of interaction with health care providers over a period of time.
- Bundled funding was considered to be a potentially useful model in future to fund care pathways which have consistent and benchmarked procedures and sequences of treatment that are consistent across the jurisdictions.
- Episodic unit of count would better support innovation in service delivery compared to current focus on volume of services/activity through SE. Further, consideration should be given to measuring outcomes or quality of bundled/episodic models of care.
- Episode may better account for complex multidisciplinary care where the amount and volume of total care is important to capture and has significant variability between groups.
- Other factors need to be considered when pricing an episode e.g. number of clinicians involved, time taken, complexity of care, comorbidities.
- The risk relating to using an episode unit of count, when applied in a fixed method, is that funding may not be sufficiently responsive to changing models of care and the setting/method of service delivery. This could inadvertently restrict innovation towards new models of care.
- Concerns regarding a time-based capitation period and the restrictive impact on services' clinical pathways with possible incentive towards gaming were raised.

Specific conditions to be considered for an episodic unit of count need further investigation. Feedback received that certain surgical pathways may be appropriate to be further investigated for the application of episodic unit of count. Palliative care, rehabilitation and stroke were also raised as areas for consideration however stakeholders noted concerns regarding the variability of complexity of patients within these areas/pathways.

Further State level considerations:

WA to further consider which clinical pathways, conditions or models of care would be appropriate for an episodic unit of count and whether these could be modelled at a local level.

7. Non-admitted patients often present with multiple comorbidities, and may be treated under a chronic disease management model. Should the future ANACC system have a separate path for classifying chronic disease patients?

WA Health recommends further consideration is given to separate pathways for chronic disease care, noting stakeholders expressed mixed views whether this should be considered for the classification:

- Further consideration is needed regarding different treatment pathways for complex chronic disease management as the level of complexity with each chronic disease patient may vary significantly.
- Implementing separate pathways may encourage or provide incentive for further development of evidence-based models of chronic conditions care to be adopted.
- Stakeholders noted concerns regarding how to define chronic disease pathways noting complexity of care and potential boundary issues for treating multiple issues. Labelling patients with a chronic disease was considered to potentially not allow the classification to be responsive to changes in patient acuity.
- Participants noted that acuity and exacerbation of conditions fluctuate in the outpatient setting and raised that the classification needs to better define and respond to these changes in acuity. Acuity was considered to be more important than chronicity of a condition. Having a separate chronic disease path may compartmentalise and restrict movement of patients according to acuity and need. The classification would therefore need to consider how to account for patients where the acuity of care may change during a non-admitted episode.
- Consideration should be given to not over complicate the data capture required or classification system itself at least in initial stages.
- Consideration should be given to the UK Patient Pathways program in the design of chronic disease of other clinical pathways for ANACC. An example of the UK Patient Pathways is provided at Attachment A.

Further State level considerations:

Nil.

8. What implementation timeframe is required for jurisdictions to transition to a patient-based non-admitted care classification system?

The implementation timeframe for ANACC will depend heavily on the resource implications for data collection and reporting, as well as system level changes such as funding models, ICT infrastructure, policies and supporting documentation, education and training requirements. It is recognised significant improvements will need to be made in costing non-admitted care services, in conjunction with improving the capture/reporting of activity data.

IHPA's proposal of an initial version by 2020 seems reasonable depending on the outcomes of this consultation process, and assuming no new data items are required for the classification system. If new data items are required, an initial implementation timeframe of three to five years is more realistic to allow for the implementation of new data items particularly if ICT enhancements/modifications are required and associated costs, validation of these new data items to support pricing of activity, and modelling of funding implications to Health Services.

Further, the ANACC is significantly different to Tier 2 and will require substantial change management and education processes to support its implementation, and associated costs. Specifically, a greater focus on how changes are communicated to clinicians, how they are trained in the use of the system and the consistency of information to be provided across health services.

WA Health seeks further information regarding whether IHPA will consider a costing/validation study to evaluate the introduction of new data items for ANACC, and support pricing and modelling of this classification in the interim until data quality is sufficient.

Further State level considerations:

What new data items are being proposed for inclusion and how can WA Health capture and report these through the existing PAS?

What is the financial impact of the required ICT modifications?

What local training and education elements are required to support the national implementation of a new classification and data elements?

9. What considerations should be made in relation to including a diagnosis-type variable in the future ANACC system?

WA Health notes the following considerations regarding use of a diagnosis-type variable for ANACC:

- Diagnosis term set needs to align with the scope of service delivery i.e. proposed list is tertiary hospital focussed and not applicable to small/medium sites and community based services.
- Consideration given to the capability of ICT infrastructure to support inclusion of diagnosis (etc) term sets, as well as clerical/other support to assist with data entry/validation.
- Consideration given to the service type and what term set should be used; and the mapping of term sets to other classifications (e.g. ICD-10-AM,ACHI SNOMED-CT AU).
- Whether a diagnosis term set is appropriate given the delivery of services by non-medical staff i.e. can all staff diagnose or only a doctor/medical practitioner?
- Diagnosis may not be confirmed in the first consultation, and may take up to two or three consultations to confirm. As such, further consideration should be given to how the ANACC account for where a diagnosis is not able to be determined and whether more general codes should be included for these events.
- The 'principal' diagnosis may also vary from the first consultation to subsequent consultations depending on the condition/s being treated. As such, consideration should be given to the ability to record multiple diagnoses (or such) for a single consultation.
- Diagnosis could be useful for identifying comorbidities.
- The capture of diagnosis in a non-admitted setting may require a significant lead time due to significant implementation requirements e.g. modification of IT systems, training of clinicians, etc.

Further State level considerations:

Noted that some patients are assessed and treated and procedures administered prior to the allocation of diagnosis or, in fact, in order to obtain a diagnosis – how to capture this activity at a local level to ensure accurate costing/modelling of services?

10. Should presenting problem be used as the diagnosis type variable? If yes, do you agree with the proposed definition of ‘presenting problem’?

WA Health received mixed views on the use of presenting problem however feedback generally supported the consideration of this variable, noting the following:

- Support for the use of presenting problem noted this approach will be useful for episodes where there is no known diagnosis or the patient is still undergoing investigation.
- WA Country Health Service currently records a list of ‘health issue’ codes which have been specifically developed for outpatient, primary health, allied health and nursing areas. However these codes are attributed to the clinic in the patient administration system when the clinic is registered rather than being attributed for each individual patient event. The list of health issues is included at Attachment B.
- Noted from use in other areas (e.g. ED and inpatient) that presenting problem may not relate to underlying cause and/or may tend to be non-specific/vague. However the quality of presenting problem data may improve as referred/scheduled service delivery models evolve. As such, another option is to consider the presenting problem/complaint for the referral.

WA Health supports the proposed definition of presenting problem.

Further State level considerations:

Nil.

11. What are your views on the proposed list of initial presenting problem/diagnosis-type and intervention-type groups presented at Appendix A? What refinements should be considered?

WA considers the proposed list of presenting problem, diagnosis and intervention groups is a good first step, however recommends that the groups require further development and refinement:

- Overall, mixed views were received on the proposed list. Some stakeholders noted the list was granular enough and comprehensive. While others noted that the list was more focussed on a tertiary hospital setting and further development was required for small to medium hospitals, community services, home-delivered services as well as interventions undertaken by nursing and allied health clinicians.
- Feedback regarding the number of presenting problem/diagnosis-type groups indicates that the degree of granularity for the diagnosis groupings is sufficient; however the procedures/intervention groups may need further development to better represent the nursing, allied health and the primary setting.
- Feedback noted that the development of a list containing multiple concepts must remain clinically meaningful, intuitive and simple to use for clinicians. Concerns were noted regarding the data quality of a list that may be too prescriptive or unintuitive.
- Implementation of such a list must be strongly evidence-based to demonstrate a strategic/clinical benefit given the significant resource and time implications for implementation.
- WA Health recommends that IHPA provide further information on whether a nomenclature based term set such as SNOMED-CT AU was considered for use in the ANACC. A term set may have some validity over a diagnosis type classification especially for services where a diagnosis may not be reached.
- It was recommended that for many cases or clinical pathways, multiple diagnosis codes would be required. This may be in the form of principal and additional. An example of this is a patient with multiple fractures/trauma. Consideration should be given to how these patients would be classified and how the diagnosis or multiple diagnoses for these patients would be captured. This issue was also raised in relation to 'multi-speciality' clinics (e.g. cardio/metabolic where a team manage genetic/metabolic cardiac conditions) where more than one condition may be treated for the patient. These patients generally display higher levels of comorbidities/complexity. Regarding cardio/metabolic, under the proposed list, does not fit well under MDC 5 or MDC 10.
- Is diagnosis to be attributed to the referral or the actual service event?
- Further consultation may be required with the primary sector to investigate how the list of diagnosis, presenting problem and interventions may apply in the primary setting to better enable comparability of data or integration of services in future years.

- Consideration given to development of business rules for when specialities cross multiple MDC codes, as it will be complex for the clinicians to search through all diagnosis groups to find the most appropriate code. For example, a vascular clinic may utilise codes under MDC 5, MDC 22, and MDC 9.
- Further review of diagnoses related to acquired brain injury, neurosurgery and head trauma. Noting there are codes included under MDC 01 and MDC 21, concern was raised there may not be much clinical value in grouping these patient groups to group all ABI's together.
- Under the proposed list, it would appear that the endocrine surgical team will be selecting the same MDC codes as the endocrine medical team. This may be fine however it is not that helpful for clinical separation of conditions and management. Some endocrine teams do run collaborative clinics but the clinical pathways for surgical patients are quite different to those able to be medically managed. Consideration will need to be given to ensuring different clinical pathways for patients that can be identified in the classification structure.
- Further consideration given to how to capture adult gender diversity services.
- Further consideration of diagnosis codes/groups for facial trauma and fractures which at present appear to be grouped under fractures to the head. This aggregation is not clinically helpful as these patient cohorts need to be separated.
- Further clarity is requested on where pre-admission will sit under the proposed list? If pre-admission clinics are required to use multiple categories for the primary diagnosis and reason for surgery this may be overly complex for the clinicians.
- Further clarity is requested on how nuclear medicine therapy will be classified under the proposed list.
- Further consideration given to classification of hand fractures and tendon repairs. Current list only includes injuries to upper limb under MDC 21.
- It was noted that procedures and diagnoses are different concepts and that the procedure/investigation/treatment plan may be used to determine what the diagnosis of the patient is. Therefore, further clarity should be provided on how these variables may be used in the classification system.
- Stakeholders noted the title of Appendix A was misleading as the table related specifically to diagnosis, presenting problem and interventions; and may have created the perception that this was the only grouping variables to be considered. In future, it is recommended that more specific titles should be applied so that stakeholders do not perceive this list as a comprehensive representation of the variables to be considered for ANACC.

WA Health has included other information which has been provided by Health Services for the IHPA's reference at Attachments C, D and E.

- Attachment C provides an indication of commonly used diagnosis descriptors categorised by Major Diagnostic Category.
- Attachment D defines a list of relevant diagnosis codes and corresponding ICP2 terms by Allied Health discipline currently used in the WA Country Health Service.
- Attachment E provides an overview of the 'service types' currently recorded by the WA Country Health Service and the volume of counts for each service.

Further State level considerations:

Reporting of diagnosis variables must be implemented in the PAS in a consistent state-wide approach to ensure comparability and quality in data.

Consideration must be given to how the implementation of these variables will integrate with public private partnership providers.

Variation across clinic PASs and their interface with WA's central webPAS may impact on the ability and time required to capture new data elements across the whole patient journey.

Mapping will be required between PASs in order to capture the necessary data elements for particular clinical areas that have their own PASs; including radiation oncology, cardiology, pulmonary.

Treatment provided to a patient in both public and private settings for the same diagnosis, such as radiation oncology, needs further consideration about how these will be counted and costed.

Implementation of a diagnosis type list into PAS will need to ensure that clinics that operate under multiple diagnosis groups will have access to the appropriate codes.

**12. Do you agree with the list of complexity variables presented in Section 5.3?
What other variables should be considered for the new ANACC system?**

WA Health generally supports the proposed list of complexity variables including age, comorbidities, multidisciplinary, new/repeat visit; noting the following:

Age

- Noted that certain age groupings may be more relevant to specific clinical pathways/conditions however in general support noted for young (0 – 4 years) and older (65+ years) patients.

Comorbidities

Consideration given to patients in palliative care, a mental health condition or with disability as this may result in greater resources required.

Multidisciplinary

- Multidisciplinary involvement is indicative of input depending on how teams, clinics and resources are structured. Encouraging models that promote patient-centric integrated care is supported however needs further exploration. For example, multidisciplinary care can include clinicians within the same clinic, from different clinics within the same hospital, or from different hospitals. These variations in service delivery should be considered regarding how they may be accounted for in the data/classification without dis-incentivising patient-centric care.

New/repeat visit

- It was noted that new visits do not always result in higher resources as in some cases more investigative work is undertaken in subsequent return visits (especially when trying to confirm a diagnosis).

Providers

- Further clarity is requested on what is defined as a 'health care provider' i.e. discipline or qualification. Assume this refers to the principal profession/discipline. If so, need to be careful not to disadvantage models of care where the principal profession may be led by nursing or medical clinicians.

Other variables to be considered

- Homelessness: is a factor which significantly increases the amount of time required for discharge planning, including liaising with external agencies outside health and carers. Homelessness may also impact on length of stay for inpatient and may increase the risks for return visit in outpatients.
- Indigenous status: Aboriginal or Torres Strait Islander patients may need different care needs due to cultural reasons, which may result in increased resource requirements. It was noted that standard clinical pathways may not be appropriate for this patient cohort and require specialised pathways.

- Culturally and Linguistically Diverse (CALD) patients: where an interpreter is required.
- Social complexity/reduced social supports: similar to homelessness, increasingly dispersed, non-nuclear families require increased resources for discharge planning and assertive follow-up to actively prevent a return visit to an outpatient setting. This factor is specifically important for child and adolescent services however this may be a consideration in other age groups and specialties.
- Other 'social' factors: refers to the multiple social reasons and complaints that may be the main reason for a patient to present and re-present to multiple providers and clinics. The patient is not seen without a reason however that reason may not always be related to diagnosis.
- Mental Health: refers to non-admitted patients with mental health conditions where the care type is not 'mental health care' or 'psychogeriatric care' due to the primary goal of care not relating to these care types. As such, these patients are included under the non-admitted scope however can be more complex and therefore require additional resources to treat.
- Child at risk: stakeholders noted that the involvement of the Department of Communities and Child Protection significantly increases the resources requirements for a patient. This is particularly relevant for antenatal clinics, as noted by a social worker:

This requires pre-birth planning and generally consists of a minimum of three meetings with child protection and stake holders from health that are generally 2 hours in length resulting in adequate documentation in medical records, liaison with patient, meeting patient at their health appointments then significant work in safety planning for the birth. I would estimate at least 12 hours direct patient contact and several hours of follow up documentation phone calls information sharing etc.

- Patient acuity: The classification does not refer to degree of patient acuity and the potential impact on both cost and patient complexity. WA notes patient acuity has been considered within the AECC and the AMHCC classifications. In order for the classification to be responsive to patients' changing clinical urgency and acuity of symptoms whilst remaining in an outpatient setting, an acuity variable and/or rating scale may ensure the classification is responsive to changing models of care. This is particularly relevant where acute patients are increasingly being able to be treated outside hospital. Demonstrating changing patient acuity may also better interface with the AECC classification particularly in situations where patients are being discharged directly from emergency departments directly to non-admitted services.

Further State level considerations:

MDC at small sites can be ad hoc and clinicians will record their individual participation rather than noting against an individual multidisciplinary clinic. Further investigation needed re how to improve reporting practices.

Attachment A: UK Patient Pathway example

Below is a description of how Patient Pathways are managed in the UK to facilitate the 18 week and cancer wait targets.

- A patient is referred to a specialty (e.g. ENT). The referral is registered onto the PAS under ENT and a unique pathway identifier is generated.
- All future activity for the episode of care is booked under this pathway identifier. The ENT service has responsibility for managing it.
- Any inpatient events, outpatient attendances or patient contacts are recorded linearly.
- The pathway can measure patient timelines and number of events.
- Where a patient is referred on to another specialty for the same condition, the same pathway is used, giving the ability to measure across services.
- If the patient is referred on for another condition, a new pathway identifier is generated.
- Patients can have multiple pathways running concurrently.
- Pathway IDs can be shared by providers, giving a picture of the entirety of the patient journey.
- This model has a significant requirement for admin staff to book under the correct pathway.
- Reports can be developed to allow management of patient pathways i.e. all patients who are close to 18 week and who do not have a recorded treatment.

Attachment B: List of 'health issues' used in the WA Country Health Service.

A variety of codes are used to give a picture of the services provided for individual/group client contacts. Codes which describe Health Issues have been aligned to the International Classification of Diseases Version 10 (ICD-10) where possible. All Health Issue codes will roll up to one of the 23 MDC's (Major Diagnostic Categories.)

01 Infectious & Parasitic Diseases

0101 Measles
0102 Hepatitis
0103 HIV/AIDS
0104 STDs
0105 Intestinal Parasites
0106 Intestinal Pathogens
0107 Tuberculosis
0108 Trachoma
0110 Head Lice/Pediculosis
0111 Hansens Disease
0112 Pertussis
0113 Meningoc.Meningitis
0114 Ross River Virus
0199 Other Infectious and Parasitic Diseases

02 Cancer

0201 Breast
0209 Musculoskeletal System Cancer
0212 Skin Ca Melanoma
0213 Skin Ca Non Melanoma
0214 Head & Neck Cancer
0215 Thoracic Cancer
0216 Genitourinary Cancer
0217 Colo-Rectal Cancer
0218 Haematology Cancer
0219 Gynaecology Cancer
0220 Neurological Cancer
0221 Upper GI Cancer
0299 Other Cancer

03 Endocrine/ Nutritional/ Metabolic/ Immunity

0301 Diabetes
0302 Nutrition
0303 Obesity
0305 Breast Feeding
0306 Nutritional Anthropometry
0307 Failure to Thrive
0309 Gout
0310 Immunity Disorders
0311 Other Metabolic Disorders
0312 Type 1 Diabetes
0313 Type 2 Diabetes
0314 Malnutrition
0315 Dehydration
0316 Type 2 Diabetes, Insulin Required
0317 Impaired Glucose Regulation
0318 Polycystic Ovarian Syndrome
0319 Underweight
0399 Other
Endocrine/Nutritional/Metab/Imm

04 Blood/Blood Forming Organs

0401 Anaemia
0406 Liver Disease
0407 Neonatal Jaundice
0408 Haemorrhagic Disease of the Newborn (Vitamin K Administration)
0499 Other Blood/Blood Forming Organs

05 Mental Health

Codes 0501-0508, 0516, 0519-0521

These codes are only used where the diagnosis has been confirmed by a medical practitioner or specialist in the relevant field.

0501 Dementia

0502 Schizophrenia

0503 Anxiety Disorder, Phobias & Depression

0504 Eating Disorders

0505 Specific Learning Difficulty/Disability

0506 Attention Deficit Disorder

0507 Affective Disorders

0508 Post Natal Depression

0509 Behavioural Disorder

0511 Low Self Esteem

0514 Enuresis (14+ years)

0515 Encoporesis (14+ Years)

0516 Personality Disorder

0518 Peri- Natal depression

0519 Psychotic Conditions

0520 Other Psychotic Conditions

0521 Other Brain Syndromes

0522 Self Harm

0523 Developmental Issues

0524 Intellectual Impairment

0525 Pervasive Development Disorder

0526 Adjustment Disorder

0527 Chronic Fatigue Syndrome

0528 Autism

0599 Other Mental Health

06 Nervous System and Sense Organs

0603 Middle Ear Diseases

0604 Hearing

0605 Vision

0606 Strabismus

0607 Eye Infections/Allergies

0608 Epilepsy

0610 Sensorineural Hearing Loss

0611 Conductive Hearing Loss

0612 External Ear Conditions

0613 Degenerative Nervous System Disorder

0614 Cerebral Palsy

0615 Spina Bifida

0616 Spinal Injury

0617 Mixed Conductive & Sensorineural Hearing Loss

0618 School Entry Screening – Vision & Hearing

0619 Vestibular Disorders

0699 Other Nervous System & Sense Organs

07 Circulatory System

0701 Hypertension

0702 Cerebro-Vascular Accidents (CVA)

0703 Peripheral Vascular Disease (PVD)/Amputations

0705 Heart Disease

0706 Rheumatic Heart Disease

0707 Chest Pain – Unspecified

0708 Oedema

0709 Hyperlipidemia

0799 Other Circulatory

08 Respiratory System

0801 Asthma

0802 Chronic Lung Disease

0803 Upper Respiratory Tract Infection (URTI)

0804 Lower Respiratory Tract Infection (LRTI)/ Bronchiolitis / Pneumonia

0806 Allergies

0899 Other Respiratory

13 Musculoskeletal System

1301 Scoliosis

1302 Foot Malformation

1303 Arthritic Disorder

1304 Degenerative Muscular Disorder

1306 Spinal Disorders without referred symptoms - Cervical Spine

1307 Spinal Disorders without referred symptoms - Thoracic Spine

1308 Spinal Disorders without referred symptoms - Lumbar Spine

1309 Spinal Disorders with referred symptoms - Cervical Spine

1310 Spinal Disorders with referred symptoms - Thoracic Spine

1311 Spinal Disorders with referred symptoms - Lumbar Spine

1312 Peripheral Disorders – Hip

1313 Peripheral Disorders – Knee

1314 Peripheral Disorder – Ankle

1315 Peripheral Disorders – Shoulder

1316 Peripheral Disorders – Elbow	1399 Other Musculoskeletal
1317 Peripheral Disorder - Wrist	14 Developmental Issues
1318 Peripheral Muscle Strains/Sprains	1401 Normal
1319 More Than One Area of Problem/Complex Problem	1402 Delay/Disorder
1321 Paediatric Torticollis	1403 Motor Coordination Conditions
1322 Biomechanical Dysfunction Lower Limb	1405 Specific Learning Difficulties/Disabilities
1323 Congenital Foot Disorder	1406 Enuresis (under 14 years)
1324 Osteoporosis	1407 Encopresis (under 14 years)
1325 Paget’s Disease	1408 Perceptual Problems
1326 Osteoarthritis	1409 Attention and Concentration Difficulties
1327 Rheumatoid Arthritis	1410 Sensory Difficulties
1328 Juvenile Chronic Arthritis	1411 Fine Motor Skill Difficulties
1329 Psoriatic Arthritis	1412 Behaviour Problem/Disorder
1330 Ankylosing Spondylitis	1413 Dyspraxia
1331 Scleroderma/Sys. Sclerosis	1414 Paediatric Oral Sensory/Motor Dysfunction
1332 Sys. Lup. Erythematosus	1415 Down Syndrome
1333 Hip Replacement	1499 Other Development
1334 Knee Replacement	15 Speech and Language
1335 Other Joint Replacement	1501 Articulation
1336 Anterior Cruciate Ligament Reconstruction (ACL)	1503 Fluency
1337 Peripheral Disorder – Foot	1504 Voice
1338 Peripheral Disorder – Hand	1505 Acquired Speech/Language Disability
1339 Fracture – Peripheral	1506 Dysphagia
1340 Fracture – Spinal	1508 Phonology –Delayed
1360 Pelvic Girdle Dysfunction	1509 Phonology – Disordered
1361 Shoulder Girdle Dysfunction	1510 Language, Delayed
1362 Fibromyalgia	1511 Language, Disordered
1363 Plagiocephaly	1512 Language, Autism Spectrum Disorder
1364 Congenital Hip Disorder	1513 Language, Literacy
1365 Peripheral Disorders – Upper Limb	1599 Other Speech and Language
1366 Peripheral Disorders – Lower Limb	

Attachment C: List of commonly used diagnoses/descriptors.

MDC	Diagnosis code description
01	Diseases and Disorders of the Nervous System
	Spina Bifida (could go under MDC8)
	Tendency to Fall
	Abnormalities of gait and mobility
	Lack of coordination
	Brain injury (could go under MDC21)
	Down's Syndrome
	Fainting Dizziness Promodal syncope
02	Diseases and Disorders of the Eye
	Vision
	Screening Vision
	Injury to eye (could go under MDC21)
03	Diseases and Disorders of the Ear, Nose, Mouth and Throat
	Separate Hearing Loss into conductive, sensorinerual and other
	Hearing
	External Ear Conditions
	Hearing Screening
	Dental
04	Diseases and Disorders of the Respiratory System
	Cough
	Allergies (could go under MDC3)
05	Diseases and Disorders of the Circulatory System
	Cerebro Vascular Accident CVA
	Peripheral Vascular Disease PVD/Amputations
	Ischaemic Heart Disease
	Rheumatic Heart Disease.
	Chest Pain - Unspec. (separate from other)
	Lymphoedema (separate fron other)
	Oedema
	Hyperlipidemia
	Prescence of cardiac vascular implant/graft

MDC	Diagnosis code description
06	Diseases and Disorders of the Digestive System
	Upper GI Cancer as distinct from other GI Cancer
	Bowel Cancer as distinct from other GI Cancer
	Colo-Rectal Cancer as distinct from other GI Cancer
	Chronic Digestive Disorder
	Nausea (as distinct from other signs and symptoms)
	Vomiting (as distinct from other signs and symptoms)
	Diarrhoea (as distinct from other signs and symptoms)
	Constipation (as distinct from other signs and symptoms)
	Incontinence -Faecal (as distinct from other signs and symptoms)
	Food Allergy (as distinct from other signs and symptoms)
	Dysphagia
	Attention to gastrostomy
	Attention to ileostomy
	Attention to colostomy
	Attn oth artf openings digestive tract
07	Diseases and Disorders of the Hepatobiliary System and Pancreas
	Neonatal Jaundice (could go into MDC15)
08	Diseases and Disorders of the Musculoskeletal System and Connective Tissue
	Scoliosis
	Foot Malformation
	Arthritic Disorder/Arthritis
	Degenerative Muscle Disorder
	Spinal disorders W/Out Symptoms Cervical
	Spinal disorders W/Out SymptomsThoracic
	Spinal disorders W/Out Symptoms Lumbar
	Spinal disorders With Symptoms Cervical
	Spinal disorders With Symptoms Thoracic
	Spinal disorders With Symptoms Lumbar
	Peripheral disorder Hip
	Peripheral disorder Knee

MDC	Diagnosis code description
	Peripheral disorder Ankle
	Peripheral disorder Shoulder
	Peripheral disorder Elbow
	Peripheral disorder Wrist
	Peripheral Muscle Strains and sprains
	More than one area of problem/Complex problem
	Paediatric Torticollis
	Torticollis
	Biomechanical dysfunction of Lower limb
	Congenital Foot Disorder
	Osteoporosis
	Paget's Disease
	Osteoarthritis
	Rheumatoid Arthritis
	Juvenile Chronic Arthritis
	Psoriatic Arthritis
	Ankylosing Spondylitis
	Scleroderma/Systemic Sclerosis
	Systemic Lupus Erythematosus
	Joint Replacement Hip
	Joint Replacement Knee
	Joint Replacement other
	A C L Reconstruction
	Peripheral disorders Foot
	Peripheral disorders Hand
	Pelvic girdle dysfunction
	Shoulder girdle dysfunction
	Fibromyalgia
	Plagiocephaly
	Congenital hip disorder
	Peripheral Disorders Upper Limb
	Peripheral Disorders Lower limb

MDC	Diagnosis code description
	Dorsalgia
	Acquired deformity
	Presence of hip implant
	Presence of knee implant
	Presence of other orthopaedic joint implant
09	Diseases and Disorders of the Skin, Subcutaneous Tissue and Breast
	Skin Cancer Melanoma as distinct from Skin Cancer Non Melanoma
	Breast Cancer (as distinct from other cancers)
	Skin Lesion (as distinct from skin ulcer or other)
	Nail Disorder
	Skin Allergies (as distinct from other)
	Scabies
	Trichiasis (this could go under MDC2)
	Sequelae of burn or other skin injury
10	Endocrine, Nutritional and Metabolic Diseases and Disorders
	Obesity (may not be linked to a metabolic disorder)
	Breast Feeding (could go into MDC14 and/or MDC15)
	Nutrition (generally may not be a deficiency)
	Nutritional Anthropometry
	Split Diabetes into Type 1 and Type 2
	Gout
	Failure to Thrive
	Underweight
	Malnutrition
	Dehydration
	Impaired Glucose Regulation
11	Diseases and Disorders of the Kidney and Urinary Tract
	Incontinence - Urine (as distinct from other signs and symptoms)
	Retention of urine (as distinct from other signs and symptoms)
12	Diseases and Disorders of the Male Reproductive System
	Testicular Cancer as separate from Prostrate Cancer
13	Diseases and Disorders of the Female Reproductive System

MDC	Diagnosis code description
	Dysmenorrhoea (as distinct from other)
	Contraceptive Management
	Menopause
	Pre Menstrual Tension
	Gynaecological exam
	Cervical Cancer (as distinct from other neoplasms)
14	Pregnancy, Childbirth and the Puerperium
	Antenatal (as distinct from other)
	Postnatal (as distinct from other)
	Gestational Diabetes
	Mastitis
	Lactation difficulty
	Antenatal Screening
	Care and examination of lactating mother
	Routine postpartum follow-up
	Postnatal Depression (could go under MDC19)
15	Newborns and Other Neonates
	Neonatal Jaundice (could go into MDC7)
16	Diseases and Disorders of the Blood and Blood Forming Organs and Immunological Disorders
	Nil.
17	Neoplastic Disorders (Haematological and Solid Neoplasms)
	Nil
18	Infectious and Parasitic Diseases
	Measles
	Tuberculosis (this could go under MDC4)
	Head Lice Pediculosis
	Meningoc. Meningitis
	Ross River Virus
	Hansen's Disease (this could go under (MDC9)
	Intestinal Parasites (this could go under MDC6)
	Intestinal Pathogens (this could go under MDC6)

MDC	Diagnosis code description
	Trachoma (this could go under MDC2)
	Pertussis (noting Whooping Cough is under MDC4)
19	Mental Diseases and Disorders
	Specific Learning Difficulty/Disability
	Enuresis (may go under MDC11)
	Encopresis (may go under MDC6)
	Attention Deficit Disorder
	Post Natal Depression (could go under MDC14)
	Peri Natal Depression (could go under MDC14)
	Low Self Esteem
	Suicide (Ideation)
	Self Harm
	Autism (may go under a different MDC)
	Pervasive Development Disorder
	Developmental Issues
	Intellectual Impairment
	Depression
	Sexuality
	Expressive language disorder
	Specific speech articulation disorder
	Normal Development
	Delay Disorder
	Motor Coordination
	Specific Learning Difficulties/Disabilitiies
	Enuresis (under 14)
	Encopresis (under 14)
	Perceptual Problems
	Attention and concentration difficulties
	Sensory Difficulties
	Fine Motor Difficulties
	Behavioural Problem Disorder
	Dyspraxia

MDC	Diagnosis code description
	Paediatric Oral Sensory Motor Dysfunction
	Other Developmental Issues
	Articulation
	Fluency
	Voice
	Acquired Speech Language Disability
	Dysphagia
	Phonology - delayed
	Phonology-disordered
	Language Delayed
	Language Disordered
	Language Autism Spectrum Disorder
	Language - Literacy
	Other Speech and Language
20	Alcohol/Drug Use and Alcohol/Drug Induced Organic Mental Disorders
	Substance Misuse - Other
	Substance Misuse - Family treatment
	Substance Misuse Tobacco
21	Injuries, Poisoning and Toxic Effects of Drugs
	Adverse effect unspecified
	Allergy unspecified
22	Burns
	Nil
23	Factors Influencing Health Status and Other Contacts with Health Services
	Sexual Health (could be male or female)
	Reproductive Issues (could be male or female)
	Immunisation
	Parenting Skills
	Family Dynamics
	Parent Child Relationships
	Partner Couple Relationships

MDC	Diagnosis code description
	Blended Family Relationships
	Other Relationships
	Parent Issues
	Current Abuse Physical
	Current Abuse Sexual
	Current Abuse Emotional
	Current Neglect
	Past Abuse (Child) Physical
	Past Abuse (Child) Sexual
	Past Abuse (Child) Emotional
	Past Neglect (Child)
	Past Abuse (Adult) Physical
	Past Abuse (Adult) Sexual
	Past Abuse (Adult) Emotional
	Past Neglect (Adult)
	Domestic Violence
	Stress & altered mood
	Post Trauma Stress
	Family Breakdown
	Loss/Grief
	Social Isolation & Social Skills
	Self-Esteem
	Para Legal (Welfare Rights)
	Welfare Practice
	Carer Issues
	Sexual Assault
	Other Social Health Issues
	Environmental Health
	Injury Health Promotion
	Physical Activity
	Lifestyle
	Self Help and Independence skills

MDC	Diagnosis code description
	Aches/Pains
	First Aid
	Congenital Disorders
	Genetic Disorders
	Bullying
	Sleep Issues
	Pyrexia of Unknown Origin
	Medications
	Falls Risk Prevention
	Health Check
	Medical Health Assessment
	Weight Check
	Pre-Admission Assessment
	Routine Child Health Examination
	Other special examination
	Attention to surgical dressings and sutures (could go to MDC9)
	Surgical Follow-up Care
	Palliative Care
	Rehabilitation Procedure
	Other Counselling
	Reduced Mobility

Attachment D: List of relevant diagnosis codes and terms by Allied Health discipline

ICD-10 Code	ICD-10 description	Term (as per ICPC-2Plus code)	Discipline
H74.9	Diseases of middle ear and mastoid	Dysfunction;middle ear	Audiology
H91.9	Hearing loss, unspecified	Loss (of);hearing	Audiology
H90.5	Sensorineural hearing loss unspecified	Deafness;sensorineural	Audiology
H90.2	conductive hearing loss, unspecified	Deafness;conductive	Audiology
H90.8	Mixed conductive and sensorineural hearing loss, unspecified	Problem;hearing also need code added for hearing:normal"	Audiology
C80.9	Malignant neoplasm, primary site unspecified	Cancer	Dietetics
E63.9	Other nutritional deficiencies, unspecified	Deficiency;nutritional	Dietetics
E66.9	Obesity, unspecified	Obesity	Dietetics
E70.9	Disorders of aromatic amino-acid metabolism	Disorder;metabolic	Dietetics
E44.1	Malnutrition mild	Malnutrition	Dietetics
E43	Malnutrition - severe	Malnutrition	Dietetics
E44.0	Malnutrition - moderate	Malnutrition	Dietetics
E73	lactose intolerance	Intolerance;lactose	Dietetics
K90.9	Intestinal malabsorption, unspecified	Malabsorption syndrome	Dietetics
Z92.22	Type 2 Diabetes, insulin required	Diabetes; Type 2; insulin treat	Dietetics
D50	Fe def anaemia	Anaemia;iron deficiency	Dietetics
F 50.2	Bulimia	Bulimia	Dietetics
F50	Anorexia	Anorexia nervosa	Dietetics
K 51	Ulcerative colitis	Colitis;ulcerative	Dietetics
K 58	Irritable Bowel syndrome	Irritable bowel syndrome	Dietetics
K57	Diverticular Disease	Disease;diverticular;intestine	Dietetics

ICD-10 Code	ICD-10 description	Term (as per ICPC-2Plus code)	Discipline
K50	Crohns disease	Disease;Crohns	Dietetics
K90	Coeliac disease	Disease;coeliac	Dietetics
K86.9	Disease of pancreas, unspecified	Disease;pancreas	Dietetics
K82.9	Disease of gallbladder, unspecified	Disease;gallbladder	Dietetics
O24.49	Diabetes mellitus in pregnancy, unspecified	Diabetes; gestational	Dietetics
F98.2	Feeding disorder of infancy and childhood	Problem;feeding;child	Dietetics
Z72.8	Other problems related to lifestyle	Problem;lifestyle	Dietetics
		Nutritional Support	Dietetics
N18.9	Chronic kidney disease, unspecified	Disease;kidney;chronic	Dietetics
M10.9	Gout, unspecified	Gout	Dietetics
E10.9	Type 1 diabetes mellitus, uncomplicated E10.x select from list	Diabetes; Type 1	Dietetics
E11.9	Type 2 diabetes mellitus, uncomplicated	Diabetes; Type 2	Dietetics
E46	Unspecified protien-energy malnutrition	Malnutrition	Dietetics
E86	Volume depletion	Dehydration	Dietetics
R73.0	Abnormal glucose tolerance test	Impaired;glucose tolerance	Dietetics
E28.2	Polycystic ovarian syndrome	Polycystic ovary syndrome	Dietetics
E88.9	Metabolic disorder, unspecified	Disorder;metabolic	Dietetics
F50.9	Eating disorder, unspecified	Disorder;eating;adult	Dietetics
I64	Cerebrovascular accident	Cerebrovascular accident	Dietetics
I51.9	Heart disease, unspecified	Disease;heart	Dietetics

ICD-10 Code	ICD-10 description	Term (as per ICPC-2Plus code)	Discipline
K21.9	Gastro-oesophageal reflux disease without oesophagitis	Disease;gastro-oesophag reflux	Dietetics
K59.0	Constipation	Constipation	Dietetics
A09.0	Other and unspecified gastroenteritis and colitis of infectious origin	Diarrhoea	Dietetics
T78.1	Other adverse food reactions, not elsewhere classified	Allergy;food	Dietetics
K92.9	Disease of the digestive system, unspecified	Disease;digestive	Dietetics
O26.9	Pregnancy related condition, unspecified	Disorder;pregnancy/delivery	Dietetics
M81.99	Osteoporosis, unspecified site	Osteoporosis	Dietetics
M10.0	Idiopathic gout	Gout	Dietetics
R13	Dysphagia	Dysphagia	Dietetics
A30.9	Leprosy, unspecified	Disease;Hansens (Leprosy)	Occupational Therapy
M10.0	Idiopathic gout	Gout	Occupational Therapy
F40	Neurotic, stress related and somatoform disorders	Disorder;somatisation	Occupational Therapy
H90.5	Sensorineural hearing loss unspecified	Deafness;sensorineural	Occupational Therapy
I25.9	Chronic ischaemic heart disease, unspecified	Disease;ischaem heart;chronic	Occupational Therapy
I09.9	Rheumatic heart disease, unspecified	Disease;rheumatic heart	Occupational Therapy
R60.1	Generalised oedema	Oedema;generalised	Occupational Therapy
L98.8	Disorder of skin and subcutaneous tissue, unspecified	Lesion;skin;generalised	Occupational Therapy
L98.4	Chronic ulcer of skin NEC	Ulcer;skin;chronic	Occupational Therapy

ICD-10 Code	ICD-10 description	Term (as per ICPC-2Plus code)	Discipline
S62.8	Fracture of other and unspecified parts of wrist and hand	Fracture;wrist	Occupational Therapy
S42.3	Fracture of shaft of humerus (fracture arm NOS)	Fracture;humerus	Occupational Therapy
M25.86	Other specified joint disorder lower leg	Pain;musculoskeletal;leg	Occupational Therapy
Z00.1	Routine child health examination	Normal patient	Occupational Therapy
F88	Unspecified disorder of psychological development	Disorder;psychological	Occupational Therapy
R63.3	feeding difficulites	Problem;feeding;adult	Occupational Therapy
T30.3	Burn of full thickness, body region unspecified	Burn(s);skin;3rd degree	Occupational Therapy
S69.9	Unspecified injury of wrist and hand	injury, hand	Occupational Therapy
T04.9	Multiple crushing injuries unspecified	Injury;crush	Occupational Therapy
Z62.82	Parent-child conflict	Problem;behaviour;(of)parent	Occupational Therapy
Z63.70	Stressful life events affecting family and household, unspecified	Stress	Occupational Therapy
R52.2	Other chronic pain	Pain;chronic	Occupational Therapy
R29.6	Tendency to fall, not elsewhere classified	Fall(s);frequent	Occupational Therapy
C41.9	Bone and articular cartilage, uspecified, malignant neoplasm	Carcinoma;musculoskel	Occupational Therapy
C72.8	Malignant lesion brain and other CNS	Carcinoma;neurological	Occupational Therapy
C80.9	Malignant neoplasm, primary site unspecified	Cancer	Occupational Therapy

ICD-10 Code	ICD-10 description	Term (as per ICPC-2Plus code)	Discipline
M10.9	Gout, unspecified	Gout	Occupational Therapy
E11.9	Type 2 diabetes mellitus, uncomplicated	Diabetes; Type 2	Occupational Therapy
F03	Dementia	Dementia	Occupational Therapy
F41.9	Anxiety disorder, unspecified or F40	Disorder;anxiety	Occupational Therapy
F50.9	Eating disorder, unspecified	Disorder;eating;adult	Occupational Therapy
F90.0	Disturbance of activity and attention. Behavioural and emotional disorders with onset usually occurring in childhood and adolescence.	Disorder;attent deficit(hyper)	Occupational Therapy
F06.9	Unspecified mental disorder due to brain damage and dysfunction and to physical disease	Disorder;mental;post brain dam	Occupational Therapy
		Injury, brain:acquired	Occupational Therapy
G46.3	Brain stem stroke syndrome	Brain stem stroke syndrome	Occupational Therapy
F79.9	Unspecified mental retardation without mention of impairment of behaviour F79.x select from list	Impairment;intellectual	Occupational Therapy
R53	Malaise and fatigue	Chronic fatigue syndrome	Occupational Therapy
F84.0	Childhood autism F84.x select from list	Disorder;autism spectrum	Occupational Therapy
F99	Mental disorder, not otherwise specified	Mental illness	Occupational Therapy
H47.7	Disorders of the visual pathways, unspecified	Decreased;vision	Occupational Therapy

ICD-10 Code	ICD-10 description	Term (as per ICPC-2Plus code)	Discipline
G31.9	Degenerative disease of nervous system, unspecified	Problem;neurological	Occupational Therapy
G20	Parkinson Disease	Disease;Parkinsons	Occupational Therapy
G35	Multiple sclerosis	Multiple sclerosis	Occupational Therapy
R27.0	Ataxia unspecified	Ataxia	Occupational Therapy
G80.9	Cerebral palsy, unspecified G80.x select from list	Palsy;cerebral	Occupational Therapy
Q05.90	Spina bifida, unspecified Q05.x select from list	Spina bifida	Occupational Therapy
G83.9	Paralytic syndrome, unspecified	Injury;spinal cord	Occupational Therapy
G98	Other disorders of nervous system, not elsewhere classified	Sympt/complaint;neurological	Occupational Therapy
I64	Cerebrovascular accident	Cerebrovascular accident	Occupational Therapy
I73.9	Peripheral vascular disease, unspecified	Disease;peripheral vascular	Occupational Therapy
I51.9	Heart disease, unspecified	Disease;heart	Occupational Therapy
I89.0	Lymphoedema, not elsewhere classified	Lymphoedema	Occupational Therapy
J44.9	Other chronic obstructive pulmonary disease	Chronic obstr pulmon disease	Occupational Therapy
J98.9	Respiratory disorder, unspecified	Disease;respiratory	Occupational Therapy
K92.9	Disease of the digestive system, unspecified	Disease;digestive	Occupational Therapy
L89.9	Decubitus ulcer and pressure area, unspecified	Ulcer;skin	Occupational Therapy

ICD-10 Code	ICD-10 description	Term (as per ICPC-2Plus code)	Discipline
M13.99	Arthritis unspecified	Arthritis	Occupational Therapy
G12.8	Spinal muscular atrophy and related syndromes	Atrophy; spinal; muscular	Occupational Therapy
M53.92	Dorsopathy, unspecified, cervical	Dysfunction;spine;cervical	Occupational Therapy
M53.94	Dorsopathy, unspecified, Thoracic	Dysfunction;spine;thoracic	Occupational Therapy
M53.96	Dorsopathy, unspecified, lumbar	Dysfunction;spine;lumbar	Occupational Therapy
M53.82	Other specified dorsopathies, cervical	Pain;back;radiating;cervical	Occupational Therapy
M53.84	Other specified dorsopathies, thoracic	Pain;back;radiating;thoracic	Occupational Therapy
M53.86	Other specified dorsopathies, lumbar	Pain;back;radiating;lumbosacra	Occupational Therapy
M25.85	Other specific joint disorders, hip/pelvic region and thigh	Pain;musculoskeletal;hip	Occupational Therapy
M22.9	Disorder of patella, unspecified	Pain;musculoskeletal;knee	Occupational Therapy
M25.87	Other specified joint disorder, ankle and foot	Pain;musculoskeletal;ankle	Occupational Therapy
M25.81	Other specified joint disorder, shoulder	Pain;musculoskeletal;shoulder	Occupational Therapy
M25.82	Other specified joint disorder, elbow/upper arm	Pain;musculoskeletal;elbow	Occupational Therapy
M25.83	Other specified joint disorder, wrist/ forearm	Pain;musculoskeletal;wrist	Occupational Therapy
M62.6	Muscle strain	Strain;muscle(s)	Occupational Therapy
M81.99	Osteoporosis, unspecified site	Osteoporosis	Occupational Therapy
M15.9	Polyarthrosis, unspecified	Osteoarthritis	Occupational Therapy
M06.99	Rheumatoid arthritis, unspecified	Rheumatoid arthritis	Occupational Therapy

ICD-10 Code	ICD-10 description	Term (as per ICPC-2Plus code)	Discipline
M08.99	Juvenile arthritis, unspecified	Arthritis;juvenile	Occupational Therapy
M07.6	Other enteropathic arthropathies	Arthritis;psoriatic	Occupational Therapy
M45.09	Ankylosing spondylitis	Ankylosing spondylitis	Occupational Therapy
Z96.64	Presence of orthopaedic joint implant - Hip	Replacement;hip;partial	Occupational Therapy
		Replacement;hip;total	Occupational Therapy
Z96.65	Presence of orthopaedic joint implant - knee	Replacement;knee;partial	Occupational Therapy
		Replacement;knee;total	Occupational Therapy
Z96.8	Presence of functional implant, unspecified	Prosthetic devices	Occupational Therapy
M25.84	Other specified joint disorder, hand	Pain;musculoskeletal;hand	Occupational Therapy
S82.9	Fracture of lower leg, part unspecified	Fracture;leg	Occupational Therapy
S42.9	Fracture of shoulder girdle, part unspecified	Fracture;shoulder	Occupational Therapy
S72.0	Fracture of neck of femur	Fracture;neck of femur	Occupational Therapy
T02.9	Multiple fractures, unspecified	Fractures;multiple	Occupational Therapy
T08.0	Fracture of spine, level unspecified	Fracture;vertebral column	Occupational Therapy
		Pain;musculoskeletal;arm	Occupational Therapy
F81.9	Development disorder of scholastic skills, unspecified	Disorder;learning	Occupational Therapy
R62.0	Delayed milestone	Delayed;milestones;child	Occupational Therapy
F82	or R27.0 Specific developmental disorder of motor function	Problem; coordination	Occupational Therapy

ICD-10 Code	ICD-10 description	Term (as per ICPC-2Plus code)	Discipline
F89	or F88 Includes visual and auditory perception, abstract reasoning, concept formation and memory.	Perceptual Problems	Occupational Therapy
F98.8	Other specified behavioural and emotional disorders with onset usually occurring in childhood and adolescence	Problem: Attention/concentration	Occupational Therapy
R29.5	Neurological neglect	Problem: Sensory processing	Occupational Therapy
F82	Specific developmental disorder of motor function or R27.8 Includes bilateral fine motor skills, intention tremor, reach and release (grasp), and handwriting.	Problem;fine motor skills	Occupational Therapy
F91.9	Conduct disorder, unspecified	Disorder;conduct	Occupational Therapy
		Disorder;behaviour;child	Occupational Therapy
F82	Specific developmental disorder of motor function	Dyspraxia	Occupational Therapy
Q90.9	Downs syndrome, unspecified	Down syndrome .	Occupational Therapy
T14.9	Injury, unspecified	Injury	Occupational Therapy
T30.0	Burn of unspecified body region, unspecified degree	Burn(s);skin	Occupational Therapy
S09.9	Unspecified injury of head	Injury;head	Occupational Therapy
Z73.9	Problem related to life management difficulty, unspecified	Problem;independent function	Occupational Therapy

ICD-10 Code	ICD-10 description	Term (as per ICPC-2Plus code)	Discipline
G47.0	Disorders of initiating and maintaining sleep	Disorder;sleep	Occupational Therapy
G46.3	Brain stem stroke syndrome	Brain stem stroke syndrome	Physio
		Injury, brain:acquired	Physio
C50.9	Malignant neoplasm of breast, unspecified	Carcinoma;breast	Physiotherapy
C72.8	Malignant lesion brain and other CNS	Carcinoma;neurological	Physiotherapy
E14.9	Unspecified diabetes mellitus, without complications	Diabetes Mellitus	Physiotherapy
E66.9	Obesity, unspecified	Obesity	Physiotherapy
R62.8	Other lack of expected normal physiological development (failure to gain weight/thrive)	Poor; weight gain; infant	Physiotherapy
G93.3	Post viral fatigue syndrome	Post viral fatigue syndrome	Physiotherapy
G20	Parkinson Disease	Disease;Parkinsons	Physiotherapy
G35	Multiple sclerosis	Multiple sclerosis	Physiotherapy
R27.0	Ataxia unspecified	Ataxia	Physiotherapy
H81.9	Disorder of vestibular function, unspecified	Disorder;vestibular system	Physiotherapy
G61	Guillain-Barre syndrome	Guillain-Barre syndrome	Physiotherapy
G70.0	Myasthenia Gravis	Myasthenia Gravis	Physiotherapy
I25.9	Chronic ischaemic heart disease, unspecified	Disease;ischaem heart;chronic	Physiotherapy
I09.9	Rheumatic heart disease, unspecified	Disease;rheumatic heart	Physiotherapy
R60.1	Generalised oedema	Oedema;generalised	Physiotherapy
R60.0	Localised oedema	Oedema;localised	Physiotherapy
Z50.0	Cardiac rehabilitation	Rehab;physical;cardiovascular	Physiotherapy
J12.9	Viral pneumonia, unspecified	Pneumonia;viral	Physiotherapy

ICD-10 Code	ICD-10 description	Term (as per ICPC-2Plus code)	Discipline
K92.9	Disease of the digestive system, unspecified	Disease;digestive	Physiotherapy
N94.9	Unspecified condition associated with female genital organs and menstrual cycle	Problem; genital;F	Physiotherapy
O91.00	Infections of breast associated with childbirth	Mastitis;puerperalis	Physiotherapy
Q66.00	Talipes equinovarus unspecified	Talipes	Physiotherapy
G71	Muscular dystrophy	Dystrophy;muscular	Physiotherapy
S83.2	Tear of meniscus, current	Tear;meniscus;knee	Physiotherapy
R29.8	Other and unspecified symptoms and signs involving the nervous and musculoskeletal systems	Problem;musculoskeletal	Physiotherapy
T03.9	Multiple dislocations, sprains and strains, unspecified	Injury;musculoskeletal	Physiotherapy
M81.99	Osteoporosis, unspecified site	Osteoporosis	Physiotherapy
S42.9	Fracture of shoulder girdle, part unspecified	Fracture;shoulder	Physiotherapy
S62.8	Fracture of other and unspecified parts of wrist and hand	Fracture;wrist	Physiotherapy
S72.0	Fracture of neck of femur	Fracture;neck of femur	Physiotherapy
T02.9	Multiple fractures, unspecified	Fractures;multiple	Physiotherapy
M25.91	Joint disorder, unspecified, shoulder	Shoulder syndrome	Physiotherapy
M79.79	Fibromyalgia	Fibromyalgia	Physiotherapy
M35.7	Hypermobility syndrome	Hypermobility syndrome	Physiotherapy

ICD-10 Code	ICD-10 description	Term (as per ICPC-2Plus code)	Discipline
M25.6	Stiffness of joint, not elsewhere classified	Stiffness;joint(s)	Physiotherapy
R26.8	Other and unspecified abnormalities of gait and mobility	Abnormal;gait	Physiotherapy
Z00.1	Routine child health examination	Normal patient	Physiotherapy
R62.0	Delayed milestone	Delayed;milestones;child	Physiotherapy
F98.8	Other specified behavioural and emotional disorders with onset usually occurring in childhood and adolescence	Problem: Attention/concentration	Physiotherapy
R29.5	Neurological neglect	Problem: Sensory processing	Physiotherapy
F82	Specific developmental disorder of motor function or R27.8 Includes bilateral fine motor skills, intention tremor, reach and release (grasp), and handwriting.	Problem;fine motor skills	Physiotherapy
F82	Specific developmental disorder of motor function	Dyspraxia	Physiotherapy
R13	Dysphagia	Dysphagia	Physiotherapy
T30.3	Burn of full thickness, body region unspecified	Burn(s);skin;3rd degree	Physiotherapy
S83.7	Injury to multiple structures of knee	Injury;knee	Physiotherapy
S46.9	Injury of unspecified muscle and tendon at shoulder and upper arm level	Injury;shoulder	Physiotherapy
S49.9	Unspecified injury of shoulder and upper arm	Injury;arm	Physiotherapy
S46.0	Injury of muscle(s) and tendon(s) of the rotator cuff of shoulder	Injury;rotator cuff	Physiotherapy

ICD-10 Code	ICD-10 description	Term (as per ICPC-2Plus code)	Discipline
S69.9	Unspecified injury of wrist and hand	injury, hand	Physiotherapy
T07	Unspecified multiple injuries or T04.9	Injury;multiple	Physiotherapy
T04.9	Multiple crushing injuries unspecified	Injury;crush	Physiotherapy
Z60.1	Atypical parenting situation or Z51.88	Problem;parenting	Physiotherapy
Z72.3	Lack of physical exercise	Unfit physically	Physiotherapy
Z72.8	Other problems related to lifestyle	Problem;lifestyle	Physiotherapy
Z73.9	Problem related to life management difficulty, unspecified	Problem;independent function	Physiotherapy
R52.9	Pain, unspecified	Pain	Physiotherapy
Q89.9	Congenital Malformations unspecified	Congenital anomalies	Physiotherapy
Q99.9	Chromosomal abnormality, unspecified	Abnormal;chromosome(s)	Physiotherapy
R55	Syncope and collapse or R42	Syncope	Physiotherapy
R52.2	Other chronic pain	Pain;chronic	Physiotherapy
W19	Fall, unspecified	Accident;fall	Physiotherapy
R29.6	Tendency to fall, not elsewhere classified	Fall(s);frequent	Physiotherapy
Z74.0	Need for assistance due to reduced mobility	Risk (of);falls	Physiotherapy
R29.3	Abnormal posture	Posture;incorrect	Physiotherapy
C41.9	Bone and articular cartilage, uspecified, malignant neoplasm	Carcinoma;musculoskel	Physiotherapy
C80.9	Malignant neoplasm, primary site unspecified	Cancer	Physiotherapy
M10.9	Gout, unspecified	Gout	Physiotherapy

ICD-10 Code	ICD-10 description	Term (as per ICPC-2Plus code)	Discipline
E70.9	Disorders of aromatic amino-acid metabolism	Disorder;metabolic	Physiotherapy
E11.9	Type 2 diabetes mellitus, uncomplicated	Diabetes; Type 2	Physiotherapy
F90.0	Disturbance of activity and attention. Behavioural and emotional disorders with onset usually occurring in childhood and adolescence.	Disorder;attent deficit(hyper)	Physiotherapy
F79.9	Unspecified mental retardation without mention of impairment of behaviour F79.x select from list	Impairment;intellectual	Physiotherapy
R53	Malaise and fatigue	Chronic fatigue syndrome	Physiotherapy
F84.0	Childhood autism F84.x select from list	Disorder;autism spectrum	Physiotherapy
G31.9	Degenerative disease of nervous system, unspecified	Problem;neurological	Physiotherapy
G80.9	Cerebral palsy, unspecified G80.x select from list	Palsy;cerebral	Physiotherapy
Q05.90	Spina bifida, unspecified Q05.x select from list	Spina bifida	Physiotherapy
G83.9	Paralytic syndrome, unspecified	Injury;spinal cord	Physiotherapy
G98	Other disorders of nervous system, not elsewhere classified	Sympt/complaint;neurological	Physiotherapy
I64	Cerebrovascular accident	Cerebrovascular accident	Physiotherapy
I73.9	Peripheral vascular disease, unspecified	Disease;peripheral vascular	Physiotherapy
I51.9	Heart disease, unspecified	Disease;heart	Physiotherapy

ICD-10 Code	ICD-10 description	Term (as per ICPC-2Plus code)	Discipline
I89.0	Lymphoedema, not elsewhere classified	Lymphoedema	Physiotherapy
I99	Other and unspecified disorders of circulatory system	Problem;circulation	Physiotherapy
I87.2	Venous insufficiency (chronic)(peripheral)	Insufficiency;venous	Physiotherapy
J45.9	Asthma	Asthma	Physiotherapy
J44.9	Other chronic obstructive pulmonary disease	Chronic obstr pulmon disease	Physiotherapy
J06.9	Acute upper respiratory infection, unspecified	Infection;upper resp tract	Physiotherapy
J20.9	Acute bronchitis, unspecified	Bronchitis;acute	Physiotherapy
J22	Unspecified acute lower respiratory infection	Infection;lower resp tract	Physiotherapy
J98.9	Respiratory disorder, unspecified	Disease;respiratory	Physiotherapy
R15	Faecal incontinence	Incontinence;faeces	Physiotherapy
R33	Retention of urine	Urinary retention	Physiotherapy
R32	Unspecified urinary incontinence	Incontinence;urine	Physiotherapy
N39.3	Stress incontinence	Incontinence;urine;stress	Physiotherapy
N39.8	Other and unspecified symptoms and signs involving the urinary system or N94.8	Impairment;urological	Physiotherapy
O26.9	Pregnancy related condition, unspecified	Disorder;pregnancy/delivery	Physiotherapy
O99.8	Other specified diseases and conditions complicating pregnancy, childbirth and the puerperium	Sympt/complaint;reprod sys;F	Physiotherapy
M41.99	Scoliosis, unspecified	Scoliosis	Physiotherapy
Q66.9	Congenital deformity of feet, unspecified	Deformity;foot;congenital	Physiotherapy

ICD-10 Code	ICD-10 description	Term (as per ICPC-2Plus code)	Discipline
M13.99	Arthritis unspecified	Arthritis	Physiotherapy
G12.8	Spinal muscular atrophy and related syndromes	Atrophy; spinal; muscular	Physiotherapy
M53.92	Dorsopathy, unspecified, cervical	Dysfunction;spine;cervical	Physiotherapy
M53.94	Dorsopathy, unspecified, Thoracic	Dysfunction;spine;thoracic	Physiotherapy
M53.96	Dorsopathy, unspecified, lumbar	Dysfunction;spine;lumbar	Physiotherapy
M53.82	Other specified dorsopathies, cervical	Pain;back;radiating;cervical	Physiotherapy
M53.84	Other specified dorsopathies, thoracic	Pain;back;radiating;thoracic	Physiotherapy
M53.86	Other specified dorsopathies, lumbar	Pain;back;radiating;lumbosacra	Physiotherapy
M25.85	Other specific joint disorders, hip/pelvic region and thigh	Pain;musculoskeletal;hip	Physiotherapy
M22.9	Disorder of patella, unspecified	Pain;musculoskeletal;knee	Physiotherapy
M25.87	Other specified joint disorder, ankle and foot	Pain;musculoskeletal;ankle	Physiotherapy
M25.81	Other specified joint disorder, shoulder	Pain;musculoskeletal;shoulder	Physiotherapy
M25.82	Other specified joint disorder, elbow/upper arm	Pain;musculoskeletal;elbow	Physiotherapy
M25.83	Other specified joint disorder, wrist/ forearm	Pain;musculoskeletal;wrist	Physiotherapy
M62.6	Muscle strain	Strain;muscle(s)	Physiotherapy
M43.6	Torticollis	Torticollis	Physiotherapy
M21.9	Acquired deformity of limb, unspecified or M21.96	Deformity;limb;acquired	Physiotherapy
M15.9	Polyarthrosis, unspecified	Osteoarthritis	Physiotherapy

ICD-10 Code	ICD-10 description	Term (as per ICPC-2Plus code)	Discipline
M06.99	Rheumatoid arthritis, unspecified	Rheumatoid arthritis	Physiotherapy
M08.99	Juvenile arthritis, unspecified	Arthritis;juvenile	Physiotherapy
M07.6	Other enteropathic arthropathies	Arthritis;psoriatic	Physiotherapy
M45.09	Ankylosing spondylitis	Ankylosing spondylitis	Physiotherapy
Z96.64	Presence of orthopaedic joint implant - Hip	Replacement;hip;partial	Physiotherapy
Z96.65	Presence of orthopaedic joint implant - knee	Replacement;knee;partial	Physiotherapy
Z96.8	Presence of functional implant, unspecified	Prosthetic devices	Physiotherapy
M23.59	Internal derangement of knee, unspecified. Chronic instability of knee	Derangement;knee;chronic	Physiotherapy
M25.87	Other specified joint disorder, foot	Pain;musculoskeletal;foot/feet	Physiotherapy
M25.84	Other specified joint disorder, hand	Pain;musculoskeletal;hand	Physiotherapy
T08.0	Fracture of spine, level unspecified	Fracture;vertebral column	Physiotherapy
Q67.3	Plagiocephaly	Plagiocephaly	Physiotherapy
Q65.8	Congenital deformity of hip, unspecified	Dislocation;hip;congenital	Physiotherapy
F81.9	Development disorder of scholastic skills, unspecified	Disorder;learning	Physiotherapy
F82	or R27.0 Specific developmental disorder of motor function	Problem; coordination	Physiotherapy
F91.9	Conduct disorder, unspecified	Disorder;conduct	Physiotherapy
Q90.9	Downs syndrome, unspecified	Down syndrome .	Physiotherapy
T14.9	Injury, unspecified	Injury	Physiotherapy

ICD-10 Code	ICD-10 description	Term (as per ICPC-2Plus code)	Discipline
T30.0	Burn of unspecified body region, unspecified degree	Burn(s);skin	Physiotherapy
S09.9	Unspecified injury of head	Injury;head	Physiotherapy
		Replacement;hip;total	Physiotherapy
		Replacement;knee;total	Physiotherapy
A30.9	Leprosy, unspecified	Disease;Hansens (Leprosy)	Podiatry
B33.1	ross river disease	Ross River fever	Podiatry
C43.9	Malignant melonoma of skin, unspecified	Melanoma	Podiatry
D48.5	Skin, neoplasm of uncertain or unknown behaviour	Carcinoma;skin	Podiatry
E66.9	Obesity, unspecified	Obesity	Podiatry
M10.0	Idiopathic gout	Gout	Podiatry
Z92.22	Type 2 Diabetes, insulin required	Diabetes; Type 2; insulin treat	Podiatry
R53	Malaise and fatigue	Chronic fatigue syndrome	Podiatry
Q05.90	Spina bifida, unspecified Q05.x select from list	Spina bifida	Podiatry
I64	Cerebrovascular accident	Cerebrovascular accident	Podiatry
I89.0	Lymphoedema, not elsewhere classified	Lymphoedema	Podiatry
I99	Other and unspecified disorders of circulatory system	Problem;circulation	Podiatry
B86	Scabies	Scabies	Podiatry
L08.9	Local infection of skin and subcutaneous tissue, unspecified	Infection;skin	Podiatry
L30.9	Dermatitis, unspecified	Allergy;skin	Podiatry
L20.9	Atopic dermatitis	Dermatitis;atopic	Podiatry

ICD-10 Code	ICD-10 description	Term (as per ICPC-2Plus code)	Discipline
L98.8	Disorder of skin and subcutaneous tissue, unspecified	Lesion;skin;generalised	Podiatry
L89.9	Decubitus ulcer and pressure area, unspecified	Ulcer;skin	Podiatry
L98.4	Chronic ulcer of skin NEC	Ulcer;skin;chronic	Podiatry
L98.9	Other disorders of the skin and subcutaneous tissue	Problem;skin	Podiatry
M41.99	Scoliosis, unspecified	Scoliosis	Podiatry
Q66.00	Talipes equinovarus unspecified	Talipes	Podiatry
S82.9	Fracture of lower leg, part unspecified	Fracture;leg	Podiatry
S42.3	Fracture of shaft of humerus (fracture arm NOS)	Fracture;humerus	Podiatry
M79.79	Fibromyalgia	Fibromyalgia	Podiatry
M25.86	Other specified joint disorder lower leg	Pain;musculoskeletal;leg	Podiatry
M25.6	Stiffness of joint, not elsewhere classified	Stiffness;joint(s)	Podiatry
R26.8	Other and unspecified abnormalities of gait and mobility	Abnormal;gait	Podiatry
Q90.9	Downs syndrome, unspecified	Down syndrome .	Podiatry
T14.9	Injury, unspecified	Injury	Podiatry

01 SCREENING

Relates to the application of a recognised rapidly applied test/examination for the presumptive identification of unrecognised disease or defect.

02 ASSESSMENT

Relates to systematic, documented physical/social/emotional/ environmental assessment.

Excludes Psychometric Assessment (Refer to Code 03).

03 PSYCHOMETRIC ASSESSMENT

Relates to a systematic/documented/recognised psychological assessment.

This Code is for use by Clinical Psychologists and Medical Officers only.

04 COUNSELLING

Relates to a mutual consultation with client(s) for the purpose of providing advice and/or to present options so that the client is able to self determine suitable means by which to improve his/her health status.

Note: It is recognised that therapeutic health counselling is provided by Social Workers & Clinical Psychologists, whereas other staff will provide supportive health counselling. Excludes Treatment (Refer to Code 06).

05 IMMUNISATION

Relates to the administration of a specific vaccine.

06 TREATMENT/THERAPY

Relates to any intervention which aims to improve the client's physical/social/emotional stage eg., breathing exercise/wound dressings/ ear syringing/activities of daily living/panadol/commencement of short course antibiotic treatment etc.

Excludes Counselling (Refer to Code 04).

07 DRUG THERAPY/MANAGEMENT

Relates to supervision of prescribed drug regimes by medical practitioners/specialists. eg insulin, psychotropic drugs.

08 EQUIPMENT/PLAN - PROVISION/INSTRUCTION

Relates to the provision of any item or equipment OR preparation of a plan/program specifically designed to benefit client or caregivers.

09 HEALTH EDUCATION/PROMOTION

Relates to education on a specific health issue or health promotional activities to promote/maintain/improve health for client/group.

10 ADVOCACY/LIAISON

Relates to health care provider actively supporting client/group on a health issue and includes consultation with other persons/departments/ agencies.

11 CASE CONFERENCE

Relates to a formalised documented meeting/discussion between team members and the client with the aim of coordinating the provision of health services to the client (client may or may not be present).

12 CLIENT TRANSPORT

Relates to transporting a client for specific health services if no other arrangements can be made.

13 REVIEW OR RE-ASSESSMENT

Relates to systematic, documented physical/social/emotional/ environmental re-assessment/review after an agreed period of time.

Note: This code is not to be used for repeat NH & MRC Schedule assessment.

14 MULTIPLE SERVICES

Relates to the provision of a number of services within one treatment session for one health issue. This code is for limited use where one service cannot be identified as the main service provided.

15 ORTHOTIC/INSOLE MANUFACTURE

Relates to the manufacture, modification and supply of orthotics & splints.

16 PSYCHIATRIC EMERGENCY

Relates to an intervention which involves rapid assessment and mobilisation of all mental health resources necessary to effectively treat the client.

17 PSYCHIATRIC CRISIS INTERVENTION

Relates to the utilisation of customary methods of problem solving during a period of upset which is time limited.

18 PALLIATIVE CARE

Relates to a service which is specifically structured to give home based palliative care and to which the client care is transferred. This may include a 'separate' service which is provided by the same organisation.

21 PRACTICAL ASSISTANCE

Relates to a service which is structured to provide practical assistance. Eg shopping, home help, banking etc.

22 COMMUNITY DEVELOPMENT

Relates to the process of working with people who share a common interest to improve their health. The essential element of the 'working with' process is that the health issues are defined by the community members, not by the health professionals, as are the goals and activities of the project.

30 PERSONAL CARE

Relates to the activities of a recognised Multi Purpose Site (MPS) for Continuing Care (CC) Clients.

NB: This code is for use by MPS personnel only.

31 CENTRE BASED DAYCARE

Relates to the activities of a recognised Multi Purpose Site (MPS) for Continuing Care (CC) Clients.

NB: This code is for use by MPS personnel only.

32 MEALS

Relates to the activities of a recognised Multi Purpose Site (MPS) for Continuing Care (CC) Clients.

NB: This code is for use by MPS personnel only.

33 RESIDENTIAL RESPITE CARE

Relates to the activities of a recognised Multi Purpose Site (MPS) for Continuing Care (CC) Clients.

NB: This code is for use by MPS personnel only.

34 HOME MAINTENENCE

Relates to the activities of a recognised Multi Purpose Site (MPS) for Continuing Care (CC) Clients.

NB: This code is for use by MPS personnel only.

35 HOME MODIFICATION

Relates to the activities of a recognised Multi Purpose Site (MPS) for Continuing Care (CC) Clients.

NB: This code is for use by MPS personnel only.

36 FORMAL LINEN SERVICE

Relates to the activities of a recognised Multi Purpose Site (MPS) for Continuing Care (CC) Clients.

NB: This code is for use by MPS personnel only.

37 DOMESTIC ASSISTANCE

Relates to the activities of a recognised Multi Purpose Site (MPS) for Continuing Care (CC) Clients.

NB: This code is for use by MPS personnel only.

38 SOCIAL SUPPORT

Relates to the activities of a recognised Multi Purpose Site (MPS) for Continuing Care (CC) Clients.

NB: This code is for use by MPS personnel only.

39 C.A.E.P. SERVICES

Relates to the activities of a C.A.E.P. officer only.

NB: This code is for use by C.A.E.P. personnel only.

40 EDINBURGH PND

Relates to the application of a recognised rapidly applied test/examination for the presumptive identification of unrecognised disease or defect.

NB: This code should be used by clinicians carrying out the Post Natal Depression screening using the Edinburgh Scale.

41 CONTACT TRACING

Relates to any contact tracing episode.

43 COMMUNITY MOTHERS PROGRAM

Relates to the specific Parent Education Program. Service Providers must have undergone the training at Curtin University.

44 WILSTAAR Program

Relates to the specific program re infant language screening, test acceleration and /or remediation.

45 ADL (Activities of Daily Living)

Relates to ADL in the Aged Care Area.

46 TRIPLE P (Positive Parenting Program)

Relates to the specific presentation of PPP groups and follow up.

47 BEST BEGINNINGS PROGRAM

Relates to the specific Best Beginnings Program.

48 PROTECTIVE BEHAVIOURS PROGRAM

Relates to the specific presentation of the Protective Behaviours Program.

49 ASTHMA FRIENDLY SCHOOLS PROGRAM

Relates to the specific Asthma Friendly Schools Program.

50 EXTERNAL FIXATION DEVICE

Includes the application, removal & adjustment of such items as Plasters, Splints and backslabs.

51 LIVING WITH DIABETES PROGRAM

Relates to the specific Living with Diabetes Program.

52 EARLY DISCHARGE PROGRAM POSTNATAL HOME VISIT, Birth-14 DAYS

Relates to contact by Early Discharge Program Nurse during the first 14 days.

NB This code should be used by Community Health Nurses carrying out the Early Discharge Program, it *should not* be used by Community Health Nurses carrying out the Birth to School Entry Universal Prevention and Early Detection Schedule. This code may be used more than once for each individual client.

53 EARLY DISCHARGE PROGRAM POSTNATAL HOME VISIT, 15+ DAYS

Relates to contact by Early Discharge Program Nurse after the first 14 days.

NB This code should be used by Community Health Nurses carrying out the Early Discharge Program, it *should not* be used by Community Health Nurses carrying out the Birth to School Entry Universal Prevention and Early Detection Schedule. This code may be used more than once for each individual client.

54 MINOR SURGERY

Includes minor 'lumps and bumps', toenails, curettage of warts etc.

55 PROPHYLACTIC TREATMENT

Relates to intervention/treatment for contacts of people who have a notifiable disease, ie they do not have the disease, but may be living with someone who does.

56 BIRTH TO SCHOOL ENTRY PROGRAM, UNIVERSAL POSTNATAL FIRST HOME VISIT, BIRTH -10 DAYS

Relates to a Universal Postnatal visit at birth -10 days to initiate and build relationships with the family.

NB This code should be used by Community Health Nurses carrying out the Birth to School Entry Universal Prevention and Early Detection Schedule. Codes 56,57 & 58 are mutually exclusive, ie only one of these three codes may be used once in any individual baby.

57 BIRTH TO SCHOOL ENTRY PROGRAM, UNIVERSAL POSTNATAL FIRST HOME VISIT, 11-21 DAYS

Relates to a Universal Postnatal visit at 11-21days to initiate and build relationships with the family.

NB This code should be used by Community Health Nurses carrying out the Birth to School Entry Universal Prevention and Early Detection Schedule. Codes 56,57 & 58 are mutually exclusive, ie only one of these three codes may be used once in any individual baby.

58 BIRTH TO SCHOOL ENTRY PROGRAM, UNIVERSAL POSTNATAL FIRST HOME VISIT, 22+ DAYS

Relates to a Universal Postnatal visit at 22+days to initiate and build relationships with the family.

NB This code should be used by Community Health Nurses carrying out the Birth to School Entry Universal Prevention and Early Detection Schedule. Codes 56,57 & 58 are mutually exclusive, ie only one of these three codes may be used once in any individual baby.

59 BIRTH TO SCHOOL ENTRY PROGRAM, 6-8 WEEK CONTACT

Relates to contact at 6-8 weeks of age focussing on Child Development and psychosocial health. Health Issue is 1401 (if normal) or 14XX as appropriate if development is not normal.

NB This code should be used by Community Health Nurses carrying out the Birth to School Entry Universal Prevention and Early Detection Schedule. This code may only be used once for each individual baby.

60 BIRTH TO SCHOOL ENTRY PROGRAM, 3-4 MONTHS CONTACT

Relates to contact at 3-4 months, focussing on Child Development and psychosocial health. Health Issue is 1401 (if normal) or 14XX as appropriate if development is not normal.

NB This code should be used by Community Health Nurses carrying out the Birth to School Entry Universal Prevention and Early Detection Schedule. This code may only be used once for each individual baby.

61 BIRTH TO SCHOOL ENTRY PROGRAM, 8 MONTH CONTACT

Relates to contact at 8 months of age focussing on Child Development and psychosocial health. Health Issue is 1401 (if normal) or 14XX as appropriate if development is not normal.

NB This code should be used by Community Health Nurses carrying out the Birth to School Entry Universal Prevention and Early Detection Schedule. This code may only be used once for each individual baby.

62 BIRTH TO SCHOOL ENTRY PROGRAM, 18 MONTH CONTACT

Relates to contact at 18 months of age focussing on Child Development and psychosocial health. Health Issue is 1401 (if normal) or 14XX as appropriate if development is not normal.

NB This code should be used by Community Health Nurses carrying out the Birth to School Entry Universal Prevention and Early Detection Schedule. This code may only be used once for each individual baby.

63 BIRTH TO SCHOOL ENTRY PROGRAM, 3-3.5 YEAR CONTACT

Relates to contact at 3-3.5 years, focussing on Child Development and psychosocial health. Health Issue is 1401 (if normal) or 14XX as appropriate if development is not normal.

NB This code should be used by Community Health Nurses carrying out the Birth to School Entry Universal Prevention and Early Detection Schedule. This code may only be used once for each individual baby.

64 BIRTH TO SCHOOL ENTRY PROGRAM, SUBSEQUENT HOME VISIT, Birth - 12 MONTHS

Relates to a subsequent Home Visit conducted during the first 12 months of the baby's life to follow up on issues identified during the Universal Postnatal first Home Visit.

NB This code should be used by Community Health Nurses carrying out the Birth to School Entry Universal Prevention and Early Detection Schedule. This code may be used *more than* once for each individual baby.

65 ELECTROCARDIOGRAPH

Relates to the Service Provider performing an ECG on a client.

66 RADIOLOGY

Relates to the Service Provider taking xrays.

67 PHLEBOTOMY

Relates to the needle puncture of a vein for the drawing of blood.

68 PPEI (Promotion, Prevention and Early Intervention Program)

Relates to the specific program of PPEI. It is the application of the Family Partnership approach, using guided promotional interviews, to promotion of infant well being and development, primary prevention of infant/parent psychosocial problems and early intervention where required.

69 PEDS (Parents' Evaluation of Developmental Status)

Relates to the application of a validated parent completed child development Screening tool for the presumptive identification of unrecognised Developmental disease or defect in children 0-8 years. Health Issue 1401 if Normal or 14XX as appropriate if development is not normal.

NB: This code should be used by clinicians carrying out opportunistic contacts only with children, and can be used on multiple occasions. PEDS is administered as a scheduled part of the Birth to School Entry contact at 3-4 months, 8 months, 18 months and 3 years, and the appropriate BTSE service provision code is used at this time. PEDS is also administered as a scheduled part of the School Entry Screening – Vision and Hearing, and the appropriate school entry Health Issue code is used. (ie, this code is used as the secondary SP code, not the Primary SP code).

70 ASQ (Ages and Stages Questionnaire)

Relates to the application of a validated parent completed child developmental screening tool for the presumptive identification of unrecognised developmental disease or defect in children 0-5.5 years. Health Issue 1402 if used secondary to PEDS.

71 ASQ:SE (Ages and Stages Questionnaire: Social Emotional)

Relates to the application of a validated parent completed child developmental screening tool for the presumptive identification of unrecognised behavioural / emotional disease or defect in children 0-6 years. Health Issue 1402 if used secondary to PEDS.

72 ASQ & ASQ:SE

Relates to the application of validated parent completed child developmental screening tools for the presumptive identification of unrecognised behavioural/emotional or developmental disease or defect in children 0-6years. Health Issue 1402 if used secondary to PEDS.

73 POST-OP REVIEW

Relates to the Service Provider providing a Post-Op review for a client.

74 OFFER: BTSE POSTNATAL FIRST CONTACT BELOW THE AGE OF 10 DAYS

Relates to contacting the primary care provider to offer a home visit or clinic visit for a universal postnatal first contact under the Birth to School Entry Policy schedule before the infant is 10 days old. This code can only be used once per client. Use this code only when contact is made directly with the primary care provider.

75 OFFER: BTSE POSTNATAL FIRST CONTACT AFTER THE AGE OF 11 DAYS

Relates to contacting the primary care provider to offer a home visit or clinic visit for a universal postnatal first contact under the Birth to School Entry Policy schedule after the infant is 11 days old. This code can only be used once per client. Use this code only when contact is made directly with the primary care provider.

76 EDINBURGH PND ASSESSMENT AT 6-8 WEEKS. BTSE CONTACT

Relates to the use of the Edinburgh Postnatal Depression Scale at 6-8 weeks postnatal under the Birth to School Entry Policy schedule. This code can only be used once per client.

77 EDINBURGH PND ASSESSMENT AT 3-4 MONTHS. BTSE CONTACT

Relates to the use of the Edinburgh Postnatal Depression Scale at 3-4 months postnatal under the Birth to School Entry Policy schedule. This code can only be used once per client.

78 EDINBURGH PND ASSESSMENT AT 8 MONTHS. BTSE CONTACT

Relates to the use of the Edinburgh Postnatal Depression Scale at 8 months postnatal under the Birth to School Entry Policy schedule. This code can only be used once per client.

200 ENHANCED HOME VISITING SERVICES

Relates to the provision of the Enhanced Home Visiting Services under the Birth to School Entry Policy schedule.

201 LACTATION CONSULTANCY

Relates to the services provided by a Lactation Consultant.

202 SLEEPMATTERS PROGRAM

Sleepmatters is a targeted intervention program for Child Health Nurses to offer to parents of children 8-18 months with behavioural sleep issues.

203 POSTNATAL PARENTING GROUPS

Relates to the provision of a Postnatal Parenting Group for primary care providers of infants less than 12 months of age.

204 TASTE BUBS PROGRAM

Relates to the specific provision of the Community Health Taste Bubs program.

205 ABORIGINAL CHILD HEALTH CHECKS WITHIN 4 WEEKS OF BIRTH

Relates to the contact within 4 weeks of birth under the Enhanced Aboriginal Child Health Schedule undertaken by the specified health professional. This code can only be used once per client.

206 ABORIGINAL CHILD HEALTH CHECKS AT 6 MONTHS Relates to the contact at 6 months under the Enhanced Aboriginal Child Health Schedule undertaken by the specified health professional. This code can only be used once per client.

207 ABORIGINAL CHILD HEALTH CHECKS AT 12 MONTHS

Relates to the contact at 12 months under the Enhanced Aboriginal Child Health Schedule undertaken by the specified health professional. This code can only be used once per client.

208 ANNUAL MEDICAL AB CHILD HEALTH ASSESSMENT: 12 MONTHS

Relates to the 12 month old assessment provided by a Community Health Medical Officer. This code can only be used once per client.

209 ABORIGINAL CHILD HEALTH CHECKS AT 2 YEARS

Relates to the contact at 2 years under the Enhanced Aboriginal Child Health Schedule undertaken by the specified health professional. This code can only be used once per client.

210 ANNUAL MEDICAL AB CHILD HEALTH ASSESSMENT: 2 YEARS

Relates to the 2 year old assessment provided by a Community Health Medical Officer. This code can only be used once per client.

211 ABORIGINAL CHILD HEALTH CHECKS AT 2.5 YEARS

Relates to the contact at 2.5 years under the Enhanced Aboriginal Child Health Schedule undertaken by the specified health professional. This code can only be used once per client.

212 ANNUAL MEDICAL AB CHILD HEALTH ASSESSMENT: 3 YEARS

Relates to the 3 year old assessment provided by a Community Health Medical Officer. This code can only be used once per client.

213 ABORIGINAL CHILD HEALTH CHECKS AT 3.5 YEARS

Relates to the contact at 3.5 years under the Enhanced Aboriginal Child Health Schedule undertaken by the specified health professional. This code can only be used once per client.

214 ABORIGINAL CHILD HEALTH CHECKS AT 4 YEARS

Relates to the contact at 4 years under the Enhanced Aboriginal Child Health Schedule undertaken by the specified health professional. This code can only be used once per client.

215 ANNUAL MEDICAL AB CHILD HEALTH ASSESSMENT: 4 YEARS

Relates to the 4 year old assessment provided by a Community Health Medical Officer. This code can only be used once per client.

216 ABORIGINAL CHILD HEALTH CHECKS AT 4.5 YEARS

Relates to the contact at 4.5 years under the Enhanced Aboriginal Child Health Schedule undertaken by the specified health professional. This code can only be used once per client.

217 ABORIGINAL CHILD HEALTH CHECKS AT 5 YEARS

Relates to the contact at 5 years under the Enhanced Aboriginal Child Health Schedule undertaken by the specified health professional. This code can only be used once per client.

218 ANNUAL MEDICAL AB CHILD HEALTH ASSESSMENT: 5 YEARS

Relates to the 4 year old assessment provided by a Community Health Medical Officer. This code can only be used once per client.

219 HAEMACURE TEST

Relates to the assessment of haemoglobin levels in the Aboriginal population.

220 SCHOOL ENTRY SCREENING - KINDERGARTEN

Relates to the School Entry Health Assessment carried out by the School Health Service for children in Kindergarten. This code can only used once for each child even if the screening is carried out over 2 days.

221 SCHOOL ENTRY SCREENING – PRE-PRIMARY

Relates to the School Entry Health Assessment carried out by the School Health Service for children in Pre-Primary provided that the child has not been screened in Kindergarten. This code can only used once for each child even if the screening is carried out over 2 days.

222 SCHOOL ENTRY SCREENING – YEAR 1

Relates to the School Entry Health Assessment carried out by the School Health Service for children in Year 1 provided that the child has not been screened in Kindergarten or Pre-Primary. This code can only used once for each child even if the screening is carried out over 2 days.

223 TARGETED WEIGHT ASSESSMENT

Relates to the provision of a Targeted Weight Assessment as per the Child and Community Health policy if a concern is raised about a child's weight in the school setting.

224 HEADSS ASSESSMENT

Relates to the use of the HEADSS screening tool as part of conducting a psychological risk assessment of an adolescent.

225 BRIEF INTERVENTION

Relates to the use of a Brief Intervention Tool to conduct an assessment and appropriate intervention to achieve a specific purpose and client goal. It may include weight loss, smoking cessation and drug addiction.

226 HEALTH PROMOTION – EDUCATION TO STUDENTS

Relates to the provision of Health Education/Promotion activities to students in a school setting.

227 HEALTH PROMOTION – EDUCATION TO PARENTS/CAREGIVERS

Relates to the provision of Health Education/Promotion activities to parents/caregivers of students in a school setting.

228 HEALTH PROMOTION – EDUCATION TO SCHOOL STAFF

Relates to the provision of Health Education/Promotion activities to School Staff in a school setting.

229 PASH – PROMOTING ADOLESCENT SEXUAL HEALTH PROGRAM

Relates to the specific provision of the PASH program in schools.

230 SEXUAL HEALTH TOOLKIT

Relates to the use of the Sexual Health Toolkit in schools.

231 PEG FEED IN SCHOOLS

Relates to the provision of nutrients via a Percutaneous Endoscopic Gastrostomy (PEG) and education/management in the Education Support School setting.

232 TRACHEOSTOMY CARE IN SCHOOLS

Relates to the care of a client with a tracheostomy in an Education Support School setting.

233 OXYGEN THERAPY IN SCHOOLS

Relates to the provision of Oxygen Therapy to a client in an Education Support School setting.

234 HEALTH CARE PLANNING WITH SCHOOL STAFF

Relates to liaising with school staff about the completion/education/management of a Health Care Plan for a student.

235 HEALTH CARE PLANNING WITH STUDENTS OR PARENTS/CAREGIVERS

Relates to liaising with students or parents/caregivers about the completion/education/management of a Health Care Plan for a student.

236 WORKING IN PARTNERSHIP WITH SCHOOL STAFF OR PRIMARY CARER TO SUPPORT THE COLLECTION OF IMMUNISATION SURVEILLANCE DATA

Relates to all immunisation surveillance matters undertaken to maximise immunisation coverage in the school setting. Excludes the provision of vaccinations.

237 PRIMARY CARE TRIPLE P

Primary Care intervention: Practical advice offered at a planned consultation (20-30 minutes face-to-face or via telephone) providing narrow, focused parenting skills training targeting discrete child behaviour problems – aided by *Triple P Tipsheets* (Level 3).

238 SEMINAR SERIES TRIPLE P

Relates to the delivery of Seminar Series Triple P. Brief intervention series of 3 stand alone 90 minute parenting advice seminars for large groups of parents with children aged 3-8. Targets common behaviour difficulties or development transitions (Level 2).

239 GROUP TRIPLE P

Relates to the delivery of Group Triple P. Broad focused parenting support program: 4 weekly group sessions and 4 follow up telephone calls (as part of 8 week program), for parents of children aged 3-8 focussing on 2 or more mild/moderate behaviour problems (Level 4).

240 LIFESTYLE TRIPLE P

Relates to the delivery of Lifestyle Triple P. Multi component intervention for parents of children aged 5-10 who are overweight or obese. 10 group sessions followed by 4 telephone calls.

241 CHILDREN IN CARE ASSESSMENT

Relates to the provision of a Health Assessment to a child in care after a referral from DCP. Use with Health Issue 1401.

242 ANTENATAL CHECK: INITIAL VISIT

Relates to the antenatal assessment/education carried out on initial visit.

This includes recording medical history and antenatal assessment including Blood Pressure, Weight, Height, Urinalysis, EPNDS and expected date of delivery.

243 ANTENATAL CHECK: 13-20 WEEKS GESTATION

Relates to the antenatal assessment/education carried out at 13-20 weeks including testing BP, Weight, Urinalysis, Oedema, Vaginal Discharge and random Blood Sugar levels.

244 ANTENATAL CHECK: 21-28 WEEKS GESTATION

Relates to the antenatal assessment/education carried out at 21-28 weeks including testing BP, Weight, Urinalysis, Oedema, Vaginal Discharge, Fundal Height, Fetal Movements, Heart Rate and Breast Examination.

245 ANTENATAL CHECK: 29-35 WEEKS GESTATION

Relates to the antenatal assessment/education carried out at 29-35 weeks including testing BP, Weight, Urinalysis, Oedema, Vaginal Discharge, Fundal Height, Fetal Movements & Position and Heart Rate.

246 ANTENATAL CHECK: 36 WEEKS+ GESTATION

Relates to the antenatal assessment/education carried out at 36 weeks or more including testing BP, Weight, Urinalysis, Oedema, Vaginal Discharge, Fundal Height, Fetal Movements & Position and Heart Rate.

99 UNSPECIFIED SERVICE PROVISION
