Good morning

Metro North Health feedback below:

"We have recently done some work around use of the FIM in rehab and GEM and shown that

- 1. It is not used by clinicians in care of the patient , but only used as part of the funding model. It takes time, effort and money to use the FIM.*
- 2. It is able to be substituted by using a Barthel and MMSE (maybe RUDAS). These tools are already used by clinicians. Saving time, effort and funds for training, without losing the funding model"*
