---

Hi,

We missed feedback deadline for the Pricing Framework for Australian Public Hospitals 20-21. Can we be added to the email list for consultation please?

Some brief comments:

- we agree patient reported outcomes needs to be a priority and also mandated to be publicly available. It also needs to be clinician by clinician, not just hospital.
- Will the Bundled Maternity Funding be investigated again? Given the Myhealth records are being rolled out (and the fact everyone already has a generated identification number through medicare which could also be used to track consumer access to maternity services), we feel that it would be timely and in line with consumer demand to have bundled funding for maternity care.

Many thanks,

Alecia Staines
